Hollywood® Bases

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2017

ORIGINAL JACK CORBETT® MLB®
HOLLYWOOD BASES®

BEST DESIGN
ON THE FIELD
Engineered to better withstand bad weather and also includes special ultraviolet inhibitors.
Premium, more durable rubber with 1200 lb. of tensile strength to prevent most cuts and tears.

TAPERED LIP
Cheap, imitation bases will often have edges that “turn up.” Our extended, tapered lip virtually eliminates all edge turn up.

Dimensions: 15” x 15” x 3”

USED BY MLB SINCE 1939
The exclusive base of Major League Baseball® for nearly 70 years. Since 1939, Jack Corbett® Hollywood Bases® have been used for every MLB® game, World Series® and All-Star Games® and is used by all six National Pro Fastpitch Softball clubs.

PRODUCT SPECS
• Comes with 1-1/2” OD x 6” stanchions
• Shipping Weight: 13 lb. (12901040); 34 lb. (12901010)
• Anchor plugs and ground anchors sold separately.
• 1,200 lbs. of tensile strength prevents most tears and cuts on the base’s rubber shell
• Custom side and top logos available.
• Premium design made to withstand bad weather during games; advanced UV inhibitors
• Printing logos sides and/or tops available.

WHOLESALE PRICE LIST  
EFFECTIVE: JANUARY 1, 2017

**HOLLYWOOD® IMPACT® BASES**

**PREMIUM DESIGN**
- Hollywood Impact® Bases feature premium construction; the double first base is a one-piece, molded base - it won't tear apart. Both feature patented chevron design and impact compression.

**IMPACT COMPRESSION**
- Both bases use patented technology to help reduce the risk of injuries: upon impact, the base compresses, thereby reducing stress on players and reducing injury risk.

**PRODUCT SPECS**
- Comes with 6” stanchions
- Shipping weight: 11 lb. (12902040); 29 lb. (12902010)
- Anchor plugs and ground anchors sold separately.

**CHEVRON BOTTOM**
- Patented Chevron design on the underside of the base is truly unique to the game. It provides stability, support and durability. Plus, it’s vital to the base’s ability to compress upon impact.

**ALL PRICES SUBJECT TO CHANGE & AVAILABILITY PLUS SHIPPING**
**HOLLYWOOD IMPACT® KWIK-RELEASE BASE**

- Premium rubber construction is ultra durable and water resistant.
- Patented design will compress upon impact, like other Hollywood Impact® Bases, but will then disengage if necessary. Two resistance levels available: varsity and youth.

**DISENGAGEMENT SYSTEM**

Fully compliant with Little League Rule 1.06, the Kwik-Release™ Base will disengage when hit with enough impact, greatly reducing the risk of injury. The orange base remains in the ground, however, to allow play to continue. Officially recommended base of Babe Ruth League Baseball® and Cal Ripken Baseball®.

**BOTTOM**

A waffle bottom design gives it plenty of strength and flexibility. The soft rubber nubs on top hold onto the top portion of the base but are soft enough for players to slide over without injury.

www.beamclay.com • sales@partac.com
The Jack Corbett® Hollywood Base® was originally patented in 1933. It was specifically designed to provide greater strength, durability and stability in a base under constant heavy usage. The present model of Jack Corbett® Hollywood Base® still sets the standard for excellence for modifications to make the Jack Corbett® Hollywood Base® even more economical than before. The modular design feature allows replacement of warn parts without requiring the purchase of a whole base when not necessary. The all-rubber covers allow a clean white appearance to cosmetically enhance the in-field, while providing longer durability. The pan, stanchion, and ground anchor sleeves are manufactured of construction steel tubing and are designed to be put into the ground in a square of cement. We the manufacturers of the Jack Corbett® Hollywood Base®, ask that you pay special attention to the installation instructions when placing the bases in your field. In order to receive the greatest percentage of financial, as well as performance benefits from the Jack Corbett® Hollywood Base®, we offer the following care and maintenance tips.

1. The ground anchoring system is the key to success with the Jack Corbett® Hollywood Base® follow the installation instructions carefully when placing the bases. This will ensure that the anchor sleeve is straight to prevent bent pins.

2. Keep the ground anchor clean! The ground anchor plug helps to keep the anchor free of debris and also sets the level of the field around the base area. When properly installed, only the tip of the plug will show when the dirt is packed around the top of it. It can stay in the ground at all times that the bases are not installed. The plug may also be kept in place on multipurpose fields while one base location is being used. See illustration. We have developed a Dig-Out Tool for use in cleaning the ground anchor sleeve and manicuring the field prior to, or during the game.

3. If the ground anchor is not cleaned, it may partly fill up with dirt and the stanchion tube may then be forced into it by the inexperienced grounds personnel. Some may even jump onto the base to force the tube into the dirty ground anchor. This tends to weaken the pan area around the top of the tube and may eventually lead to cracked or bent pan, or a broken tube. The pan does not have a hole at the weld point, and if the tube breaks through, it will be difficult, if not impossible, to reweld.

4. If the above practice has taken place, extra unnecessary strain is put on the base upon removal from the ground anchor. If it is twisted or pried loose from the compacted anchor, the result may be torn rubber covers at the junction of the assembly strips.

5. Use a standard household cleaner to assist in the cleaning of the Jack Corbett® Hollywood Base®. Simply spray on and wipe off with damp cloth or sponge. In most cases, a rinsing by the hose is not necessary. If however moisture accumulates in or on the base, due to atmospheric conditions, watering of grounds, or cleaning, store your base leaning on the tube, or hanging, tube side down, from a bar rack. This will help you avoid puddle and eventually rusting around the stanchion tube weld area and on the inside next to the cushion.

90 day manufacturer’s warranty against defective parts and materials.

**WARNING:** SCHUTT SPORTS ADVISES THAT SLIDING INTO A BASEBALL BASE REPRESENTS A CLEAR AND PRESENT DANGER. INJURY MAY RESULT

INSTALLATION INSTRUCTIONS FOR HOLLYWOOD BASES® GROUND ANCHORS

Note: Any method of installing ground anchors, other than shown in these instructions, will create damage to the bases and the warranty will become void.

1. Locate base paths.
2. Measure to the proper base distance along foul lines at 1st and 3rd base, square with inside corner of diamond, center line © For 2bd base, center the base at the intersection of 1st and 3rd base paths.
3. Excavate a 12" x12" square hole, nine inches deep.
4. Drive a 1 ½" square wooded stake, whose sides are parallel to, and 6 3/4" from, each of the two base lines. Check vertical position of stake both ways with level or plumb bob to assure accuracy. Stake must be removed later so do not set too firmly to allow easy withdraw.

   It is imperative that the stake be used to keep the anchor straight and to insure the concrete does not flow up inside the ground anchor tube, which in turn may not allow the base pan stanchion tube to fully seat in the anchor.

5. Slide ground anchor over stake, anchor fins down, and rest it in soil at bottom of stake. Press into soil so top of anchor rim is one inch below ground level of base area.
6. Tamp a small amount of soil around base area of square tube and anchor fins to prevent concrete from touching wooden stake or blocking hole below tube end, maintaining the 1" position below ground level.

Mix and pour concrete to embed anchor 2" from top of the anchor tube. Allow concrete to harden completely before removal of stake.

Install the ground anchor plug, (#BBP-1) into the anchor tube. Fill the cavity with dirt up to ground level. Only the indicator portion of the plug should be showing after this step.

Prior to game:
Remove the plug from the ground anchor tube, and clean any loose dirt if necessary from the tube with the Hollywood Dig-Out Tool, (#T-RB-51). This tool may also be used during games or field maintenance to remove debris from the anchor tube.

CAUTION:
Upon installing the Jack Corbett Hollywood Bases, be sure that the cavity around the anchor tube is filled with dirt, and that the base fits into the anchor cleanly, making sure that all bottom surfaces of the rubber cover are in intimate contact with the dirt at ground level or slightly below.

AFTER THE GAME:
Remove the base from the ground anchor for storing, and replace the ground anchor plug, (#BBP-1) covering same with dirt to the ground level.

Pre-Assembled Rubber Base Anchor System

No Muss .. No Fuss!
Fast Alternative to Concrete Installation

PABF 175
1¾” Steel Female Anchor Stem
for Hollywood, MacGregor and many others with 1¾” female base anchors

#PABF 175/1 Singles

$35.95

- A quick and easy way to set your base ground anchor without using concrete.
- Just bury and tamp in place. You are ready to insert base and play.
- Set includes recycled rubber platform with built-in male or female anchor stem.
- Pre-assembled with anchors in place.
- Heavy duty recycled rubber base. 10” x 10” x 3” (7 lb.)

Sets of 3 are BEST VALUE!

#PABF 175/3 Set of 3 with FREE Base Plugs

$105

Installing Bases: the MarkSmart™ Way
...with Pre-Assembled Base Foundations (PABF)
Steps to Fast, Easy, Accurate Base Installation:

1. Determine the appropriate Field Layout. See Table below. All infill distances are measured from the point of Homeplate to the outer corner of 1st and 3rd base and center of 2nd base.

2. Dig 20” diameter hole no less than 10” deep for each base. Create a firm foundation using crushed stone or Baseball Clay at bottom of base. We suggest a minimum of 1 to 1-1/2” of material. Foundation should be tamped and leveled.

3. Place PABF anchor on leveled material. Center of PABF should be 7.5” from String Line and 7.5” toward Homeplate. Recheck and make sure PABF is level.

4. Backfill around PABF up to field level. Note: Top of Anchor should be 1” below field level. Rubber or Feathered Base Plugs are recommended if base is not in place.
