BEAM CLAY®

MTP Turf Paints

ATHLETIC FIELD MARKING PAINT 88-30

The BRIGHTEST "SUPER PAINT" of the "SUPER BOWLS"!
Formerly Mautz® Paint

You have seen our Athletic Field Paints for many years on Super Bowls, Pro Bowls, numerous NFL stadiums and universities.

MTP athletic field marking paint is specifically designed for marking lines, numbers and logos on all types of athletic fields: football, baseball, soccer, and track & field events.

**WHY USE
MTP
88-30?**

- ...88-30 has a special, proven, exclusive formula.
- ...Easily applied by brush, roller, airless spray or line marking machines.
- ...Absolutely safe to use, **WILL NOT HARM GRASS!!**
- ...**DOES NOT CONTAIN ANY LEAD OR MERCURY!!**
- ...Actually stimulates root growth and development.
- ...Allows photosynthesis and respiration to continue.
- ...Will not blur with rough usage; long lasting and inexpensive to use.
- ...Harmless to the eyes and skin. Will not stain uniforms.
- ...88-30 is in a **concentrated** paste form, for less storage space, lower shipping costs.
- ...Artificial Turf paints available.
- ...**Brightest white** and sharpest matches to team colors for vivid television appearance.
- ...Readily available in 5 gallon containers, in white and all team colors.

88-30 is concentrated and designed to be reduced with water prior to application. Generally, blending with electric drill and mixer is recommended.

1 gallon 88-30 to 1 gallon water...first application.
1 gallon 88-30 to up to 5 gallons...recoating.

Some paints have high levels of metal acetate salts or combinations of iodized carbamates, etc. which can kill turf. Other paints might be overruns or mistinted which are then modified for athletic turf. **MTP Athletic Field Marking Paints** are specifically designed for athletic fields and will not harm turf. They actually enhance root growth and permit photosynthesis to continue through the paint film.

Remember, the lowest cost product may not be the best. Plus, painting more frequently costs more than using the best paint. **MTP Athletic Field Marking Paints** being concentrated will save you money because the dilution ratios will lower your expense to mark and remark your fields.

For first field marking, mix on a one-to-one ratio (one part paint to one part water); but for remarking mix at up to a one-to-five ratio.

BEAM CLAY®

Foul Pole & Goal Post Paint System

WHOLESALE PRICE LIST
EFFECTIVE: JANUARY 1, 2015**Foul Pole & Goal Post Paint System****RECOMENDATIONS:**

Saturn yellow is a fluorescent paint that requires a white primer undercoat. Light passes through the transparent yellow then reflects off of the white primer to get the glow. The clear protector will extend the life of this system. If you don't apply the Filterray clear UV protector over the yellow you can expect about two years life. If you use the clear protector you can expect four years or more life.

For two gooseneck goal posts we recommend two gallons of #63 White Primer, two gallons of #64 Saturn Yellow and two gallons of the #65 Filterray Clear coat.

We do offer a less expensive alternative. A 100% Acrylic white or yellow that does not glow and does not need the clear coat. You can expect a couple of years usage, see #66 below. We recommend two gallons for two goal posts, or one gallon for 2 foul poles.

BEAM CLAY® FOUL POLE & GOAL POST PAINT

MTP TURFGREEN PERMANENT TURF COLORANT

Non-toxic, completely safe for turf. Long-lasting, permanent green pigment (not a dye). Restores the natural green color to turf. Prior to application, cut turf to desired height. One gallon mixed with water will cover 4,000 to 12,000 s.f. of turf. Typically, a 1:7 (colorant to water) ratio is recommended on dormant turf, and a 1:15 ratio on other turf. For best results on any discolored area, two applications are recommended to blend the colored area into the surrounding healthy turf.

1 gallon containers, 4/case, plus shipping #TG-1

20 oz. aerosol cans #238, 12/case, Free Shipping 48 States!

- \$45/gal
- \$215/Case

Average coverage of 80 sq. ft./can for touch-up, 12 cans/H.S. Football Field, 5 cans/Soccer Field.

ALL PRICES SUBJECT TO CHANGE & AVAILABILITY

TURFGREEN

- Non-Toxic
- Completely Safe for Turf
- Permanent Green Pigment (not a dye)
- Restores the Natural Green Color to Turf
- Great Color For Dormancy
- Quick Fix for Diseased Areas
- Covers up to 12,000 SF/Gallon

PRIOR TO APPLICATION

Cut turf to desired height. One gallon (3.78 liters) will cover 4,000 to 12,000 square feet (370-1115 m²) of turf. The area covered will vary with the rate used, type and condition of grass being treated, and turf color desired. Typically a 1:7 colorant to water ratio is recommended on dormant turf, and a 1:15 ratio on other turf.

DIRECTIONS

Dormant Application: Dilute one gallon (3.78 liters) with 7 to 9 gallons (26-34 liters) of water. For a darker turf color, reduce the volume of water. Some experimentation may be required with the water to colorant ratio to obtain the exact color desired.

Non-Dormant Application: Dilute one gallon (3.78 liters) with 15 to 20 gallons (56-75 liters) of water. Again, the application rate depends on the desired color. For best results on any discolored area, two applications are recommended to blend the colored area in with the surrounding healthy turf.

CAUTION

Keep out of the reach of children. Do not take internally. In case of eye contact, flush with large amounts of water and consult a physician. In case of ingestion, dilute with water or milk and consult a physician. Do not re-use this container. Rinse contents into the spray tank and crush prior to disposal. Do not apply to food or feed crops or grain after harvest. A spray shield is recommended for applications if overspray or drift is potential problem.

Avoid overspray on concrete, masonry, or any other objects where color is not desired. Permanent staining may occur. Accidental overspray may be removed by a water rinse prior to drying. Rinse spray tank, spray nozzles, and screens thoroughly with water immediately following use. Use with centrifugal pumps may cause seals to leak. For best results, use low to medium sprayer pressure.

If this product is mixed with pesticides, the entire mixture, including rinsate, must be handled and disposed of according to all applicable local, state, and federal guidelines.

NewRider 1700 Airless Riding Field Line Striper

The **NewRider 1700 Airless Riding Field Line Striper** is a smaller version of our **NewRider 5000**, but shares many of the same great features, designed to produce the brightest, straightest lines available on natural or artificial turf. The airless pump with adjustable pressure lets you dial in the spray so you spray "just the turf" without wasting paint or injecting the soil or disturbing the rubber filling. The front swivel caster follows ground contours for consistent line width. Plus, the high back seat provides the operator comfort.

The **NewRider 1700 Airless Riding Field Line Striper** features:

Brighter Lines - Fully adjustable, 0-3000psi pump pressure. You control the perfect pressure to apply thinned or non-thinned paints. You get complete coverage of "just the turf" without injecting or smothering the soil. The result is healthier turf and brighter lines with any paint.

Consistent Line Width - The floating, front swivel caster allows the spray gun to follow ground contours while maintaining the line width for more consistent lines over rough terrain.

Easy to Use - Seat based operator controls for ignition, throttle and parking brake. Foot pedals control forward/reverse speed and spray gun activation.

Easy Clean Up - On-board 2.5 gallon purge tank lets you clean spray gun and hose *in the field*. In-line filter keeps you running without clogs.

Versatile - A quick release clamp allows you to remove the spray gun to spray stencils, small curves and hard to reach areas with a 25'length hose.

Powerful - A 10.5 HP Briggs & Stratton OHV engine with electric start powers the hydrostatic transaxle and airless spray pump.

Fewer Stops - The 25 gallon poly tank lets you stripe an entire football field or up to four full-size soccer fields with one filling.

36 Month Warranty - Every Newstripe machine is covered with our Equipment Protection plan for a full 36-months.

NewRider™ 5000 Airless Riding Field Line Striper

The **NewRider™ 5000 Airless Riding Field Line Striper** is the first true ride-on airless paint striping machine designed to produce the brightest, straightest lines available on natural or artificial turf. Front wheel drive with rear steer produces straighter lines than comparable front steer machines. The airless pump with adjustable pressure lets you dial in the spray so you spray "just the turf" without wasting paint or injecting the soil or disturbing the rubber filling. The front swivel caster follows ground contours for consistent line width. Plus, an adjustable tilt steering column and high back seat provide operator comfort and let you enter and exit the machine with ease.

The **NewRider™ 5000 Airless Riding Field Line Striper** gives you:

Straighter Lines - The **NewRider™ 5000** has front wheel drive with rear steering. Placing the spray gun closer to the pivot point of the machine means less movement of the spray gun compared to movement of the steering wheel. The low seat height of just 30" and center spray head allow you to sight down existing lines or easily follow layout strings for the straightest lines possible.

Brighter Lines - Fully adjustable, 0-3000psi pump pressure. You control the perfect pressure to apply thinned or non-thinned paints. You get complete coverage of "just the turf" without injecting or smothering the soil. The result is healthier turf and brighter lines with any paint.

Consistent Line Width - The floating, front swivel caster allows the spray gun to follow ground contours while maintaining the line width for more consistent lines over rough terrain.

Easy to Use - The adjustable, tilt steering column allows easy enter and exit of machine. Seat based operator controls for ignition, throttle and parking brake. Foot pedals control forward/reverse, speed, spray gun activation, steering column lock and lifting or lowering the spray head.

Easy Clean Up - On-board 2.5 gallon purge tank lets you clean spray gun and hose *in the field*. In-line filter keeps you running without clogs.

Versatile - A quick release clamp allows you to remove the spray gun to spray stencils, small curves and hard to reach areas with a 25'length hose.

Powerful - A 14 hp Subaru-Robin OHC engine with electric start powers the hydrostatic transaxle and airless spray pump.

Fewer Stops - The 50 gallon poly tank lets you stripe up to four football fields or up to seven full-size soccer fields with one filling.

36 Month Warranty - Every Newstripe machine is covered with Newstripe's Equipment Protection plan for a full 36-months.

4250™ AIRLESS PAVEMENT & ATHLETIC FIELDS STRIPING MACHINE

The **All New Newstripe 4250™ Airless Striping Machine** is our most economical high pressure airless striper. It shares the great features of the **4400™ and 4600™ SP Self-Propelled Airless Striping Machines**. The lightweight design of 105 lbs. makes it easy to push across the roughest athletic fields while producing bright, straight 2"-6" wide lines. Plus, the 3000 psi adjustable pressure pump lets you spray perfect lines without wasting paint. Easy to use, handle mounted controls let you quickly and efficiently stripe without time consuming and costly set up.

The **4250™ Airless Striping Machine** features:

Straighter Lines - The 10" pneumatic tires and four wheel design, provides straighter lines when striping on both smooth and uneven surfaces.

Brighter Lines - Fully adjustable, 0-3000 psi pump pressure. You control the perfect pressure to apply thinned or non-thinned paints. The result is a higher quality line without wasting paint.

Easy To Use - Paint is pulled directly from any standard 5-gallon pail. A universal lid snaps on any pail to prevent spills.

Easy Cleanup - Color changes and clean up are a snap. Simply remove the pail with unused paint, place a pail with 1-2 gallons of water or solvent (depending on the paint being used) on the machine and flush the system. Run the liquid pump protector through the system and your machine is ready for the next striping job.

Versatile - Stripe Athletic fields or parking lots. Plus, a quick release clamp allows you to remove the spray gun to spray stencils, curbs, and hard to reach areas with a 25' length hose. An optional rear caster is also available to spray arcs and circles.

Straighter Lines – The 10" pneumatic balloon tires and four wheel design provides straighter lines when striping all surfaces, from smooth concrete to rough athletic fields.

Brighter Lines - Fully adjustable, 0-3000 psi pump airless pressure. You control the perfect pressure to apply thinned or non-thinned paints. The result is a higher quality line without wasting paint. Plus, the hydraulic driven paint pump is non-pulsating so you get the best line edges possible. Say goodbye to ragged and scalloped edges common with pulsating piston pumps.

No More Pushing – Get more done with less fatigue. The simple friction drives pulls the striper over uneven surfaces and up inclines making the **4600 SP** the perfect paint striping machine to use all day. It's unique, simple design is easy and inexpensive to maintain.

Easy To Use – The airless pump pulls the paint directly from any standard 5-gallon pail. A universal lid snaps on any pail to prevent spills. A single lever easily engages the drive, and a locking spray trigger relieves operator fatigue when striping long lines on paved area or athletic fields.

Easy Cleanup - Color changes and clean up can be done in less than five minutes. Simply remove the pail with unused striping paint, place a half filled pail of water or solvent (depending on the paint being used) on the striping machine and flush the system. Run the liquid pump protector through the system, and your machine is ready for the next striping job.

Versatile - A quick release clamp allows you to remove the spray gun to paint stencils, curbs, and hard to reach areas with a 25' length hose. An optional rear caster is also available to easily spray arcs and circles.

36 Month Warranty - Like every Newstripe machine, the **4600SP Self-Propelled Airless Striper** is proudly **MADE IN THE USA** AND covered with our Newstripe Equipment Protection plan for a full 36-months.

ECOLINER FIELD STRIPING MACHINE

BATTERY POWERED

Part # 10004483 (Battery Powered)

\$1,050

ECOLINER™ BATTERY POWERED FIELD STRIPING MACHINE - 10004483

The **EcoLiner™ Battery Powered Field Striping Machine** features a heavy duty, diaphragm pump powered by a 12-volt deep cycle battery. Quickly and easily paint professional quality lines for hours on a single battery charge. No expensive gasoline engines or compressors to maintain. Plus, the **EcoLiner™** is proudly **MADE IN THE USA** giving you the trusted quality and durability you deserve.

The **EcoLiner™ Battery Powered Field Striping Machine** features:

No Messy Pouring and Easy to Use – Simply, place a 5-gallon pail of pre-mixed paint on the machine and you are ready to mark your field. Plus, changing colors is both fast and easy to do with the operator friendly design.

Safe Operation - No pressurized tanks. No need to release pressure to add paint or clean. No high-pressure pump output to prohibit operator injury.

Cleanup is a Snap - When finished painting, simply flush clean water through the spraying system and the machine is ready for your next field marking job.

Paint Fields in Half the Time – The efficient spray nozzle design paints high-quality lines the first time, eliminating the need for tedious touchup and repainting of lines for increased visibility. Plus, the line width is fully adjustable from 2"-6", allowing for greater flexibility to meet your field marking needs.

NeverFlat Tires – Perfect for use on athletic fields, the **EcoLiner™ Field Striper** is assembled with **NeverFlat Tires** with a knobby tread that meets the rigorous demands of uneven turf and will never go flat.

No More Clogged Tips and Drips - The **EcoLiner™ Field Striper** features a large mesh filter on the intake hose with an additional inline filter and check valve to eliminate clogged tips and messy dripping. Cleaning the filters and tips takes less than 30 seconds.

Built to Last – Made with all welded steel construction and quality components to provide you with years of trouble-free service.

12 Month Limited Warranty – Guaranteed protection against defects in materials and workmanship.

ECOLINER FIELD STRIPING MACHINE BATTERY POWERED

Part # 10004484 (Battery Powered)

\$1,295

ECOLINER™ PLUS BATTERY POWERED FIELD STRIPING MACHINE - 10004484

The EcoLiner™ Plus Battery Powered Field Striping Machine features a heavy duty, diaphragm pump powered by a 12-volt deep cycle battery. Quickly and easily paint professional quality lines for hours on a single battery charge. No expensive gasoline engines or compressors to maintain. Also, the EcoLiner™ Plus is proudly **MADE IN THE USA** giving you the trusted quality and durability you deserve.

The EcoLiner™ Plus Battery Powered Field Striping Machine features:

No Messy Pouring and Easy to Use – Simply, place a 5-gallon pail of premixed paint on the machine and you are ready to mark your field. Plus, changing colors is both fast and easy to do with the operator friendly design.

Safe Operation - No pressurized tanks. No need to release pressure to add paint or clean. No high-pressure pump output to prohibit operator injury.

Cleanup is a Snap - When finished painting, simply flush clean water through the spraying system and the machine is ready for your next field marking job. Plus, the EcoLiner™ Plus has an onboard clean water reservoir that allows for instantaneous cleaning of the spraying system without the need of additional water buckets and containers.

Paint Fields in Half the Time – The efficient spray nozzle design paints high-quality lines the first time, eliminating the need for tedious touchup and repainting of lines for increased visibility. Plus, the line width is fully adjustable from 2"-6", allowing for greater flexibility to meet your field marking needs.

NeverFlat Tires – Perfect for use on athletic fields, the EcoLiner™ Field Striper is assembled with **NeverFlat Tires** with a knobby tread that meets the rigorous demands of uneven turf and will never go flat.

Convenience – The EcoLiner™ Plus Field Striping Machine comes equipped with a quick charge 120V plug in battery charger to provide the fastest charging time available. This rapid battery charger is a great time-savings addition for increased performance flexibility.

Versatile - A quick release clamp allows you to remove the spray gun for effortless painting of stencils with a 12' length hose.

No More Clogged Tips and Drips - The EcoLiner™ Plus Field Striper features a large mesh filter on the intake hose with an additional inline filter and check valve to eliminate clogged tips and messy dripping. Cleaning the filters and tips takes less than 30 seconds.

Built to Last – Made with all welded steel construction and quality components to provide you with years of trouble-free service.

12 Month Limited Warranty – Guaranteed protection against defects in materials and workmanship.

WHOLESALE PRICE LIST
EFFECTIVE: NOVEMBER 1, 2015

ECOLINER II FIELD STRIPING MACHINE

ENGINE POWERED

**Part # 10003370****\$1,895**

Want the features of the **EcoLiner™ Battery Powered Field Striping Machine** but with the power of gasoline engine? Then the **EcoLiner™ II Field Striping Machine** is for you.

The **EcoLiner™ II Field Striping Machine** features:

Engine Powered - The **EcoLiner™ II** features a heavy duty, 45 psi diaphragm pump coupled directly to a 4.5 hp Subaru industrial gas engine.

No Messy Pouring and Easy to Use - Just place a standard 5-gallon pail of premixed paint on the **EcoLiner™ II** and you are ready to stripe your field. Plus, changing color could not easier.

Safe - No hazardous pressurized tanks. No need to release pressure to add paint or clean.

Cleanup is a Snap - When the job is done just remove the pail, reseal it for future use, pump a little clear water through the system, and you are ready for the next field lining job.

Mark fields in Half the Time - For perfect stadium marking use the Bi-Directional spray head paints both the front and back of the grass at the same time. or, save paint by shutting one nozzle off for marking practice fields. Line width is adjustable from 2"-6".

Never Stop to Stir the Paint Again - Recirculating pump keeps the paint continually mixed with no settling. You no longer need to stop and stir.

No More Clogged Tip or Filter - The **EcoLiner™ II** features a large replaceable foot filter on the intake hose. Cleaning the filter takes less than 30 seconds.

Build to Last – American Made all welded steel construction and quality components mean the **EcoLiner™ II** will give you years of service.

18 Month Limited Warranty - The longest available

NEWSTRIPE ECOLINER, ECOLINER II, ECOLINER SP

Available Options

Hashmark Master - Easily paint hash marks five times faster than other methods. Eliminates repeated measuring or using stencils and templates that require a two or three man crew.

The **Hashmark Master** quickly attaches to any Newstripe field marking machine. The operator follows the automatic line-up guide from one hash mark to the next, paints it and moves on. It is that simple. Your hash marks will be perfectly laid out and painted every time. The **Hashmark Master** will easily pay for itself during the first football season.

Part # 1000892

\$575

PerfectCircle - Paint absolutely perfect circles and arcs easier and faster than ever before. The spray head's unique spring-loaded feature precisely and automatically guides the paint machine in a perfect circle. Locate the center of the circle or arc to be painted and push the pivot point into the ground. Attach the lightweight aircraft cable between the spray head and the pivot point. Then, simply push the machine and let the PerfectCircle do the work of guiding the field marker.

Part # 10001656

\$145

Rear Swivel Caster - Fifth wheel swivel caster for arcs and circles. **Easily bolts on any Newstripe machine.** Simple drop down latch raises rear wheels to paint circles and arcs, lifts and locks in up position to paint straight lines.

Part # 10001231

\$225

Hand Gun Kit: Part - Low-pressure handgun with 12' hose and 24" wand extension for painting field markings or stencils. Comfortable pistol grip with in-line strainer to prevent clogging.

Part # 10000201

\$170

5 Gallon Strainer - This unique product lets you pour unstrained paint directly into a 5-gallon pail. It fits snugly on the top of the pail so there is no worry of tipping or spilling. Once the paint has been poured through the strainer it can be removed, cleaned with water and reused. Sold in package of 5 strainers.

Part # 10003569

SCOTSMAN PAVEMENT & ATHLETIC FIELDS STRIPING MACHINE

Part# 10000960

\$675

The **Scotsman™ Hand Pump Line Striping Machine** is the least expensive bulk paint machine Newstripe manufactures. It is ideal for those on a tight budget who want to step up from aerosol can markers or dry line machines. This low-pressure striper is packed with features found only on markers costing hundreds of dollars more.

The **Scotsman™ Hand Pump Line Striping Machine** features:

Easy to Use - Four 8" wheels, full loop handle and hand control lever make the **Scotsman™** easy to control for straight, accurate lines. The side mounted spray head adjusts from 2" to 6" line to save. A built-in hand pump pressurizes the paint. The easy to read pressure gauge lets you keep the paint pressure exactly right.

Upgradable - Mark 35 percent faster with the available CO2 power pack. One charge of the 5-lb CO2 cylinder will mark 4-6 mile of 4" wide line.

Build to Last - American made with all welded steel construction, four gallon industrial grade tank and components add up to years of trouble free line marking.

Simple to use - A built-in hand pump pressurizes the paint. The easy to read pressure gauge lets you keep the paint pressure exactly right.

18 Month Limited Warranty - The longest available.

ATHLETIC FIELD STENCILS

**Time-tested, Coach-approved...
Our standard stencils let you DO-IT-YOURSELF!**

**EZ FOLD
Hashmark Guide**

\$165

EZ Fold™ NFL style Number Set

A new innovative and affordable side line number set for football fields. The set includes 0-1-2-3-4-5 and a direction arrow. The numbers have cut-out handles and fold into a small size making it easier to take to the field and store on the shelf in a box provided. What makes this most unique is the accordion fold and the stencils are cut in a fashion to permit one person to paint the numbers with two colors in minutes. Storage size, folded and boxed, measures 6"x22"x48" and is an AMAZING 25 POUNDS!

\$559

MTP's work has been seen on television for many years. They have provided products for 33 Super Bowls. MTP has proudly provided design, stencils, paint and labor for these and numerous World Series games, plus most NCAA televised events.

MTP invented the one piece field stencil design.

MTP also has an excellent Art Department that designs many of the NFL centerfield and end zone stencils and can produce custom stencils of ANY SIZE DESIRED.

How to get a Quote

1. Fax or e-mail us an existing version of your artwork. If you do not have finished artwork send us a sketch or copy of:

- an embroidered patch
- a business card
- a photograph
- stationery
- program guide
- letterhead

2. We will create black & white line art - at NO CHARGE - of the proposed logo and send it back to you for approval. We can discuss changes and create a final version of the stencil and give you a quote.

3. We then create the stencil in full size and ship it to you. We can also provide any paint and tools needed for you to do the job

4. Lead time for making a stencil is around two weeks, but call us if you need it quicker.

Some useful hints:

If you have a PC and are graphically proficient, you can provide us with a graphics file of this art. JPEGs are the most common, but we can open most file types.

If you have a camera, send us a photo of a pleasing graphic that you'd like us to adapt to a field stencil.

Also, stencils are available for wall logos, gymnasium walls and floors, building walls, - any hard surface logos—indoors or outdoors.

ATHLETIC FIELD STENCILS

INSTRUCTION FOR USING MTP ONE-PIECE STENCILS: *A step-by-step guide*

1. Fasten stencil to area desired, using weights or our stencil anchors.

2. Spray the stencil openings with our aerosol turf paint, then remove stencil.

3. Spray to connect the dots with an airless paint sprayer, our EZ sprayer or aerosol, then fill in large areas with our bulk field paint.

4. Finish the details, touch up and you're done!
