

The MARKSMART™ Field Marking System

Step-by-step guide to eliminate repeated measuring and staking.

From now on...

Just connect the dots.

Any Time is the RIGHT TIME to Mark Your Fields PRE-SEASON:

You have to stake and measure anyhow. Why not install MarkSmart and your staking and measuring days are over.

MID-SEASON: You already have the field lined and set. Why not permanently mark critical locations with **MarkSmart™** so your staking and measuring days are over.

POST-SEASON: Before the lines fade away, install **MarkSmart™** and you're ready to connect the dots for next season, without staking and measuring.

...It's the Only Field Lining System available that includes the Multi-purpose Ground Socket that:

- Is easily installed and permanently locates critical line intersections.
- Accepts a Lining peg which, with string attached, provides plumb line for lining fields.
- Holds or anchors Game-Day Field Markers on the windiest of days.

This simple system has saved hundreds of hours of field set-up time at thousands of schools, parks and recreation departments.

1 LOCATE STARTING POINT (Corner of Field)

Drive Installation Tool into ground with hammer or rubber mallet.

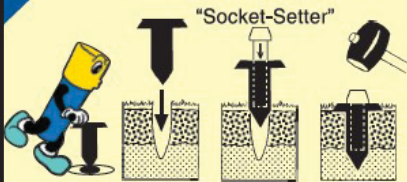

Gently tap Installation Tool from right to left to loosen & remove from ground.

2 INSERT GROUND SOCKET

Place Ground Socket in position. Set "Socket-Setter" in place as shown.

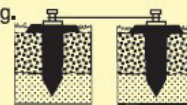

Using Mallet, tap Ground Socket into hole until socket is flush with ground surface.

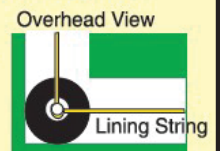

4 NOW YOU'RE READY TO STRING LINES AND...

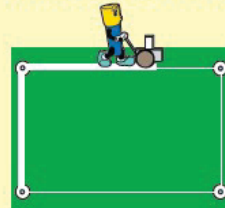

Insert lining peg into ground sockets and attach string.

With MarkSmart... you're always on center.

...JUST CONNECT THE DOTS

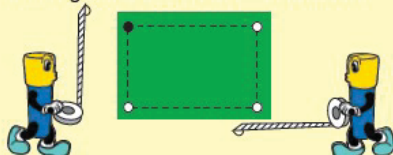

Follow string lines to paint field.

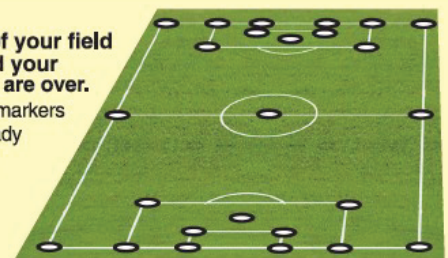

3 MEASURE REMAINING LINE INTERSECTIONS AND CRITICAL LOCATIONS

Insert ground socket at each location.

NOW... The perimeter of your field is complete and your measuring days are over.

Add game day markers and you're ready to play!
