### Protective and Boundary Netting

Protective and boundary netting is used to protect players, spectators, scoreboards, buildings and other structures in and around the ball park. The netting is customized to fit your needs and is completely weather-treated. Netting is either finished with black reinforced vinyl edging or a sewn rope border for Plateena or Pylon. Polyethylene with reinforced vinyl edging only. Nylon with rope looped thru openings (not sewn). Vinyl edging available at additional charge on Nylon.

### Reinforced Vinyl Edging

Provides the netting with added strength while keeping the nets shape. Reinforced double stitched vinyl also gives the net a sharp appearance. No extra charge for optional Brass Grommets every 18”.

### #18 Twisted Knotted Plateena

**Professional backstop netting.** #18 Twisted, Knotted, UHMPE Ultra High Molecular Weight Polyethylene with a 462 lb. break strength; Trade Name: Plateena (similar netting trade names include Dyneema or Spectra), 1-3/4” square mesh. FieldPro Net Systems

In today’s congested sports complexes with multi-use fields in close proximity to each other, keeping balls within the confines of the field is important. Stop wasting time chasing missed shots or errant passes during practice and games. Ensure safety of the athletes, coaches, and spectators alike on adjacent fields and tracks. **FieldPro™ Net Systems** offer ultimate design flexibility to suit all perimeter netting needs.

**Six Different Heights and Pole Styles**

- **10’ Straight Pole** with multi-sport net is ideal for use as a Lacrosse and Field Hockey backstop net. The net is clipped at the top and bottom of each pole.
- **15’, 20’, 30’, and 40’ Straight Pole** comes with a hoist system allowing quick and easy lowering/removal of the net after the game, season, or before a big storm. Re-installing the net is a snap - all from ground level with no need for a ladder.
- **20’ Offset Pole** provides 3’ of offset which is ideal for use around the perimeter of soccer and baseball/softball fields. It’s also an added measure of safety from ricocheting balls.

**Basic Features and Recommendations**

- Pole spacing should not exceed 20’
- Net systems should be set back at least 25’ from playing field
- Pulley system to raise/lower net (excludes 10’ poles)
- Ground sleeves and caps facilitate installation and allow for system removal
- Corrosion-resistant hardware included
- Specify preferred pole color when ordering
- Made in the USA
- Ships via common Carrier
