Cart / Walking Path Mixes & Stabilizer®

**PARTAC®**  
**NATURAL**  
**PATHWAY & GOLF CART PATH MIXES**

Use near greens (instead of macadam or concrete) for firm, smooth surfaces with great drainage that stop rather than bounce golf balls!

Available in 3/16" minus Burgundy Red, Grey, Tan or White crushed stone with either a 20% **Beam Clay® Binder** for smoother surface, or a 5% **Beam Clay® Binder** for a somewhat crunchier surface, or with Stabilizer® a natural organic binder "Stabilized" for an even firmer, yet more resilient surface—each with excellent drainage and resistance to erosion. Excellent natural surfaces for walking paths, jogging trails, driveways, or patios. Also, the effect is subtle. The surface looks like natural aggregate. Upon further inspection you notice the aggregate holds together. **The Path when wet, is stable.** These binders will not transform the aggregate into concrete- you can still feel the crunch of the gravel under foot. It simply makes an aggregate stronger where you want a natural, rugged appearance, but you also want better performance. **Easy to maintain:** Recommended maintenance is to scarify and roll each spring. Otherwise, drag mat as needed to maintain smooth surface. Recommended depth is 1" - 3" depending on your base. If poorly draining soil, stabilize base first with 3/4" minus road stone.

**3/16" Burgundy Red Cart / Pathway Mix**

One cubic yard weighs approximately 2,700 lbs., plus add 20% for compaction. Each 1" compacted requires approximately 5 tons per 1,000 square feet.

**STABILIZER®**

- A colorless, odorless natural glue that binds sand & aggregates together producing firm yet well-draining surfaces. The natural way to provide excellent moisture control, dust control, and erosion prevention for golf cart paths, tee approaches, sand trap bases, edges and banks.

**For cart paths** uniformly work in 1 lb. or more every 10-20 sq. ft. (3" deep), wet and roll; or blend 15-17 lbs. of **Stabilizer®** per ton of crushed aggregate screenings, wet and roll. **For sand trap bases, edges, and banks** uniformly blend 20-25 lbs. **Stabilizer®** and 3 lbs. **Sports Grids** into each 1 ton of 1/8" minus aggregate, make into a slurry, spread 2" deep, roll and/or tamp. **To firm existing trap sands** uniformly work in 1 lb. **Stabilizer®** every 5 sq. ft. (4" deep), or blend 10 lbs. into each 1 ton of sand. 40 lb. bags - up to 50/pallet.

2. Physical properties of the rubber composite:
  - a) Density 0.6 oz/cu in (ASTM C642)
  - b) Durometer Hardness 65A ± 7 (ASTM D2240)
  - c) Tensile Strength\* minimum 125 psi (ASTM D412)  
(\* main structural areas)
  - d) Compression deformation 10% at 70psi, 68°F (ASTM D575)
  - e) Brittleness at Low temperature: -40°F (ASTM D746)
  - f) Freeze and thaw when exposed (ASTM C672)  
to deicing chemicals no loss after 50 cycles
  - g) Coefficient of thermal expansion: 8 x10<sup>-5</sup> in/in/°F (ASTM C531)
  - h) Weathering 70 hours at 158°F (ASTM D573)
    - hardness retained 100% (± 5%)
    - compressive strength 100% (± 5%)
    - tensile strength 100% (± 5%)
    - elongation retained 100% (± 5%)
3. Available models:
  - a) 3"W x 4"H x 72"L with weight of 23 lbs.
  - b) 4"W x 6"H x 72"L with weight of 45 lbs.
  - c) 4"W x 8"H x 72"L with weight of 70 lbs.
  - c) 3"W x 4"H x 48"L with weight of 14 lbs.
4. Finishing color: dark brown

#### Installation methods:

- a) with 2 spikes 18" long x 3/8" diameter provided for each 4" high piece
- b) with 2 spikes 24" long x 3/8" diameter provided for each 6" high or 8" high piece

Note: The mounting holes can be closed after installation with the rubber plugs 1-1/8 diameter and 3/4" long, supplied with the product.

**The Original Infield Erasers**

The **Eraser** rubber mat is one of the most sought after grooming devices for your field golf courses made in decades! It will even work in adverse, damp soil conditions. Its lightweight design makes it easy for any groundskeepers, coach, player or golf superintendent to use and transport. As you pull the drag mat, it will percolate and dry the material giving your field a professional finish. Another benefit while dragging is that it will not harm your grass, mound, greens or home plate if it inadvertently comes into contact with them. The **Eraser** mat is great for dragging in top dressing on greens without damage to the greens. Also perfect for breaking up core plugs on fairways! When finished grooming with an **Eraser**, very little material is left in the mat. The flexible mat material is easy to roll and unroll and can be driven over without damage. With proper care and storage the **Eraser** will outlast the competition.

- 3'W x 5'D (includes Tow Rope) **#05480** / 22 lbs. **\$130**
- 5'W x 3'D (includes Tow Rope) **#05481** / 23 lbs. **\$140**

- No Chain #05534-NC** / 40 lbs. **\$195**

**The Original Infield Drakes**

The **Drake** is an innovative solution that combines two professional grooming tools into one. As you pull the drag, the head will open and scarify your soil while the mat grooms your surface to a pristine and professional finish. The **Drake** can be ordered with standard flexible steel mat which is constructed from 3/8" deep x .46" thick crimp with a 1" x 1" mesh, or with the innovative **Eraser** rubber mat. The scarifier head with serrated teeth is constructed of heavy-duty aluminum and is more effective at digging than most other lute rakes.

**The Original Infield Eraser Mops**

The latest and greatest induction to baseline/home plate and mound maintenance equipment! The 66" aluminum handle allows precision control in small areas including mounds, infield edges, base baths, on-deck circles and any other cutouts. The unique design of these tools allows you to work the area using the **Drake Mop**, and finish groom with the innovative **Eraser** mat on both mops. These are a must have for any and all field maintenance warriors and staff.
