TYPAR® GEOTEXTILE FABRICS

SHIP WEIGHT

F.O.B., NJ
Single Rolls

F.O.B., TN
(Available in Tri-Packs ONLY)

TYPAR® 3151, 3201, 3301 Grey

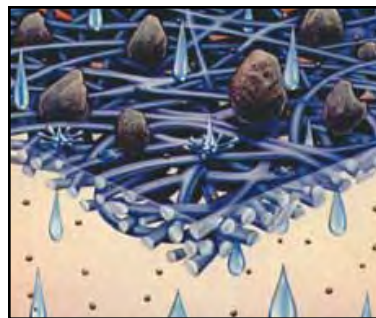

Lightweight non-woven geo-textiles, thermally spunbonded from polypropylene, designed for separating playing surfaces from coarse drainage bases, **when water flow is a primary function.**

TYPAR® 3151 GREY(3 ROLLS/PACK) 1.6 oz./sq. yd. Our thinnest and most porous fabric, especially recommended for covering drainage base of baseball and softball infields to let fines pass through rather than plug fabric. Cover with at least 2" of sand before installing infield mix to prevent blinding fabric during installation and to provide a warning layer for the future: should the infield be deeply scarified or rototilled, the sand layer will be hit before catching the fabric.

60" (5') x 300' (SINGLES ONLY) 167sy, 1,500 SF	23 lbs.	\$95	\$79
151"(12'7") x 300' 419sy, 3,750 SF	62 lbs.	\$235	\$195

TYPAR® BIOBARRIER is a long-term vertical root control system that consists of time-release nodules of trifluralin herbicide permanently bonded onto a permeable geotextile fabric. When strategically placed into the soil, it prevents damage from root encroachment into valuable surfaces long-term (minimum of 15 years) without harming trees or nearby landscaping.

TYPAR® BIOBARRIER is also a long-term horizontal weed control system. Placed on the ground like a landscape fabric and covered with up to two inches of stone, mulch or other cover material, the trifluralin in BioBarrier is slowly released from the nodules. The constant release of trifluralin creates a narrow (approx. 2 inches) zone on either side of the fabric. Bio Barrier is effective because the zone of trifluralin extends into the stone, mulch or other cover material. Since weeds are unable to develop a strong root system in the presence of trifluralin, they are unable to survive when their roots reach the zone. Allow 4-6" overlap at seams. BioBarrier is more effective long-term (minimum 10 years) than any landscape fabric available.

SOL-Aer® Winter Turf Blanket

Silver Lace Coated or Uncoated Basic White

Aer-Flo Inc., known for its innovative sports field products, introduces the next generation of winter turf protection. SOL-Aer Winter Turf Blankets combine a revolutionary bi-component fabric with a proven heat absorbing lace coating, resulting in improved insulation for winter-weary grass root systems.

- Fabric of unique bi-component fibers made of polypropylene sheathed in polyethylene means strength and durability.
- Same silver lace top coating as used on Radiant product.
- Fusion welded seams and super tough fabric means it can be moved and walked on without damage.
- 50% sunlight penetration and Silver lace coating increases daylight warming and decreases nighttime cooling.
- Lightweight, one-piece construction is easily cut without fraying making for easier installation, removal and storage.

SOL-Aer™ Winter Turf Blanket with Silver Lace Coating

SOL-Aer Turf Blanket with Vipol® Edging & #4 Grommets Installed All Around – On Uncoated White Non-Woven OR Silver Lace Coated

- Non-woven fabric provides additional nighttime thermal insulation.
- Tighter-than-woven fabric lets light, water, & air thru, but not insects.
- Vipol edging for strength and non-stripping breathability.
- Excellent at both frost protection and moisture retention.
- Promotes earlier and more rapid germination and greening.
- Standard Sizes: 10'x20' 20'x50' 50'x60' 60'x90' 70'x90' 90'x90' 80'x110'
- Custom sizes and cuts are readily available.

With its ground-breaking non-woven co-polymer fabric and proven heat absorbing/reflection lace coating SOL-Aer Winter Turf Blanket is the last best turf protector you will ever need.
