

TYPAR® GEOTEXTILE FABRICS

SHIP WEIGHT

F.O.B., NJ
Single Rolls

F.O.B., TN
(Available in Tri-Packs ONLY)

TYPAR® 3151, 3201, 3301 Grey

Lightweight non-woven geo-textiles, thermally spunbonded from polypropylene, designed for separating playing surfaces from coarse drainage bases, **when water flow is a primary function.**

TYPAR® 3151 GREY(3 ROLLS/PACK) 1.6 oz./sq. yd. Our thinnest and most porous fabric, especially recommended for covering drainage base of baseball and softball infields to let fines pass through rather than plug fabric. Cover with at least 2" of sand before installing infield mix to prevent blinding fabric during installation and to provide a warning layer for the future: should the infield be deeply scarified or rototilled, the sand layer will be hit before catching the fabric.

60" (5') x 300' (SINGLES ONLY) 167sy, 1,500 SF	23 lbs.	\$88	\$75
151"(12'7") x 300' 419sy, 3,750 SF	62 lbs.	\$220	\$185

TYPAR® 3201 GREY (3 ROLLS/PACK)

1.9 oz./sq. yd.

36" (3') x 300' 100sy	17 lbs.	\$58	\$48

TYPAR® BIOBARRIER is a long-term vertical root control system that consists of time-release nodules of trifluralin herbicide permanently bonded onto a permeable geotextile fabric. When strategically placed into the soil, it prevents damage from root encroachment into valuable surfaces long-term (minimum of 15 years) without harming trees or nearby landscaping.

TYPAR® BIOBARRIER is also a long-term horizontal weed control system. Placed on the ground like a landscape fabric and covered with up to two inches of stone, mulch or other cover material, the trifluralin in BioBarrier is slowly released from the nodules. The constant release of trifluralin from BioBarrier creates a narrow (approx. 2 inches) zone on either side of the fabric. Bio Barrier is effective because the zone of trifluralin extends into the stone, mulch or other cover material. Since weeds are unable to develop a strong root system in the presence of trifluralin, they are unable to survive when their roots reach the zone. Allow 4-6" overlap at seams. BioBarrier is more effective long-term (minimum 10 years) than any landscape fabric available.

TURF DEFENDER® TURF BLANKETS #3311WW

Woven (3 oz./sq. yd.) white polypropylene turf blankets with 4 ply double stitched hem on all sides and heavy-duty brass grommets every 5'. These ultra high strength turf blankets are designed for those open areas traditionally more exposed to high winds. With all four edges finished, **Turf Defender® Turf Blankets** are the strongest in the industry, effectively protecting turf from the winter elements and allowing for an earlier green-up. Sod staples and storage bag for labeling included. **8-year** pro-rated warranty for manufacturing defects and UV-resistance.
