Soft Touch™ Bases

SOFT TOUCH™ PROGRESSIVE RELEASE BASES

Progressive release bases are designed to flex and absorb energy as a player slides into the base. In case of a short slide, the "progressive release" action allows the base to flex until enough force is applied to "pop" the base free from its mount. Available in 3 styles: Premium In-Ground Mount, Spike Down, or Anchor Style T-Stanchion. Little League Approved.

PREMIUM "A" SERIES IN-GROUND:

Molded from durable cut-resistant polyurethane, the molded 7" stem fits over the yellow play-plug and inside the ground mount. The yellow play-plug remains in place when the base comes free to fill most of the cavity and reduces the potential of a player stepping inside the ground mount.

- A1500 3 - 15" Bases, Ground Mounts & play plugs
- Y1400 3 - 14" Youth Bases, Ground Mounts & play plugs
- A150L 3 - 15" Bases—Covers Only
- Y140L 3 - 14" Youth Bases—Covers Only

- \$660
- \$635
- \$525
- \$485

"S" SERIES SPIKE DOWN:

Portable mounting system designed for easy installation, replacement, and removal for infields without ground anchors using three 3/8" x 12" metal spikes through the white mounting tee. Spikes included. No ground anchors needed!

- S1500 3 - 15" Bases, Mounting Tees & Spikes
- S1400 3 - 14" Bases, Mounting Tees & Spikes
- S150L 3 - 15" Bases—Covers Only
- S140L 3 - 14" Bases—Covers Only

- \$625
- \$610
- \$390
- \$385

"C" SERIES CONVERTIBLE FOR IN-GROUND METAL ANCHORS:

Designed to fit into your existing 1-1/2" female or 1" male ground anchors. If needed, ground anchors are sold separately.

- C1500 3 - 15" Bases & Convertible Tees
- C1400 3 - 14" Bases & Convertible Tees

BEAM CLAY®**Soft Touch™ Bases—“A” Series Premium In-Ground Mount Bases Installation Instructions****Soft Touch® “A” Series-Premium In-Ground Mount Bases Installation Instructions**

These instructions should be read thoroughly before installation. If there are questions concerning the installation or use of these bases, consult Soft Touch® Bases before using them.

The patented Soft Touch® base is designed for easy installation and maintenance. It is designed to flex and absorb energy as a player slides into the base. A forceful slide applied to the base will disengage it from the mount, to be replaced easily after disengagement.

Ground Mount Cement Installation:

(NOTE: This is the recommended installation method.)

- Step 1:** Make sure site is level.
- Step 2:** Place the base upside down in the proper location (square to the base line for 1st base). Mark the outline of the base on the ground. (See Fig. 1)
- Step 3:** Excavate a 10"x 10" square in the center of the base outline for the ground receptacle and cement.
- Step 4:** Place cement around the sides and bottom of the hole so that the flange fits one inch below the playing surface. Cement should be lapped slightly over the corner braces only in the bottom. The center of the receptacle should have no cement installed and should be left open for drainage. Taper the cement 3" from the top of the flange at a 45° angle. (See Fig. 2)
- Step 5:** After the cement has dried, level and tamp the ground around the top of the receptacle to insure that the base will lay flat and level and that the flange is at the correct depth of one inch from the playing surface.

(To speed the installation process the mounts can be encased in cement off site and allowed to dry before installation)

FOR MAXIMUM STABILITY, THE UNDERSIDE OF THE BASE SHOULD MAKE FULL CONTACT WITH THE GROUND AT ALL TIMES WITH NO VOIDS OR HOLLOWES.

Ground Mount Dirt Installation: (NOTE: It is recommended that the ground receptacle be cemented in place.)

- Step 1:** Follow steps 1 and 2 above for cement installation.
- Step 2:** Excavate an 8" x 8" square in the center of the base outline for the ground receptacle.
- Step 3:** Place the ground receptacle in the hole with the flange of the mount one inch below the playing surface. Pack and tamp the dirt around the sides and bottom of receptacle. The final installation depth should be one inch below ground level.

FOR MAXIMUM STABILITY, THE UNDERSIDE OF THE BASE SHOULD MAKE FULL CONTACT WITH THE GROUND AT ALL TIMES WITH NO VOIDS OR HOLLOWES.

CAUTION

The flange of the ground receptacle should not be less than one inch below the playing surface at any time to insure that players will not make contact with it.

PRICES SUBJECT TO CHANGE & AVAILABILITY PLUS SHIPPING | VOLUME DISCOUNTS AVAILABLE | COOPERATIVE PURCHASING CONTRACT PRICING FOR 50 STATES

Soft Touch® "A" Series-Premium In-Ground Mount Bases Installation Instructions *continued***Tapered Yellow Plug**

The yellow plug is to be used inside each ground receptacle *during* play. Placing widest part in first, firmly push yellow plug into ground receptacle until properly seated. Bases will then fit over the top of the yellow plugs. When a base releases from the ground receptacle, this plug will prevent a player from stepping into an open hole.

When the base has been dislodged it can be replaced quickly and easily. Before replacement, the ground should be leveled out to eliminate any buildup of dirt under the base and any dirt in the receptacle should be removed to insure that the base will sit fully supported by the ground and level. *Optional:* Heavy duty drag plugs can be purchased for dragging the field and filling the receptacle when the bases are not in use.

PLEASE NOTE

If the base releases easily or releases too frequently, check the distance from the flange top to the playing surface. The distance should be one inch. The deeper the receptacle is buried, the easier the base will pop out of the ground mount. Remember, the base should always lay flat with full ground support on the underside. Dirt will sometimes build up during play, increasing the depth at which the ground mount is buried. It is important that a proper and regular maintenance program be followed to insure that the bases will lay flat and level on the field and perform as intended.

**Warranty**

Soft Touch® bases are warranted against defects in materials and workmanship when used in a usual and customary manner for one year (defined as a regular season of normal length for softball or baseball). Warranty is void if any changes are made to the original mounting system or not installed as per installation instructions. **Proof of purchase is required in the form of dealer PO number, invoice number, or any other documentation that will verify when products were purchased.** Normal wear and tear is excluded from coverage. **Pictures of defective merchandise are required** and the Manufacturer may request that merchandise be returned before any warranty adjustment will be made. The liability of the Manufacturer for a warranty is limited to either a refund of the purchase or replacement of the defective product.

Disclaimer

Be advised that sliding into a baseball/softball base may cause serious and permanent injury. No base, however constructed or designed, can prevent all injuries and the Soft Touch® base is no exception. The Manufacturer advises that deviation from installation instructions, failure to properly install and maintain bases, and failure to properly groom playing surfaces around bases and home plate area, could increase the risk of injury to players. Under no circumstances should these bases or base anchors be modified, altered, tampered with, or used when they are damaged, as serious injury may occur. Buyer is responsible for furnishing proper installation instructions to the purchaser.

Rev. 10/19/17

Soft Touch® A Series –A15DBL Installation Instructions

These instructions should be read thoroughly before installation. If there are questions concerning the installation or use of these bases, consult Soft Touch® Bases before using them.

The Soft Touch® Double First Base with Soft Touch® In-ground mount, disk, and spike has been designed to alleviate the problems of installation and misalignment with regular double stem bases and ground mounts. **Although the double first base uses the patented disk anchor from the Soft Touch® base system, the base is not designed as a release or pop-off style base.**

PLEASE NOTE

The Soft Touch Double First Base is not a "progressive release" or "pop-off" style base due to the dual anchor system and should not be used in that way.

Ground Mount Cement Installation: (NOTE: This is the recommended installation method.)

- Step 1: Make sure site is level.
- Step 2: Place the base upside down in the proper location (square to the base line for 1st base). Mark the outline of the base on the ground. (See Fig. 1)
- Step 3: Excavate a 10"x 10" square in the center of the base outline for the ground receptacle and cement.
- Step 4: Place cement around the sides and bottom of the hole so that the flange fits one inch below the playing surface. Cement should be lapped slightly over the corner braces only in the bottom. The center of the receptacle should have no cement installed and should be left open for drainage. Taper the cement 3" from the top of the flange at a 45° angle. (See Fig. 2)
- Step 5: After the cement has dried, level and tamp the ground around the top of the receptacle to insure that the base will lay flat and level and that the flange is at the correct depth of one inch from the playing surface. (To speed the installation process the mounts can be encased in cement off site and allowed to dry before installation)

FOR MAXIMUM STABILITY, THE UNDERSIDE OF THE BASE SHOULD MAKE FULL CONTACT WITH THE GROUND AT ALL TIMES WITH NO VOIDS OR HOLLOWES.

Ground Mount Dirt Installation: (NOTE: It is recommended that the ground receptacle be cemented in place.)

- Step 1: Follow steps 1 and 2 above for cement installation.
- Step 2: Excavate an 8" x 8" square in the center of the base outline for the ground receptacle.
- Step 3: Place the ground receptacle in the hole with the flange of the mount one inch below the playing surface. Pack and tamp the dirt around the sides and bottom of receptacle. The final installation depth should be one inch below ground level.

FOR MAXIMUM STABILITY, THE UNDERSIDE OF THE BASE SHOULD MAKE FULL CONTACT WITH THE GROUND AT ALL TIMES WITH NO VOIDS OR HOLLOWES.

CAUTION

The flange of the ground receptacle should not be less than one inch below the playing surface at any time to insure that players will not make contact with it.

BEAM CLAY®**Soft Touch™ Bases—“A” Series Premium In-Ground Mount Bases Installation Instructions****Soft Touch® A Series –A15DBL Installation Instructions *continued*****Tapered Yellow Plug**

The yellow plug is to be used inside each ground receptacle *during* play. Placing widest part in first, firmly push yellow plug into ground receptacle until properly seated. Bases will then fit over the top of the yellow plugs. When a base releases from the ground receptacle, this plug will prevent a player from stepping into an open hole.

Mounting for Orange Base with disk:

- Step 1: The orange portion of the base should be in the foul territory. Press down the orange cover to make an impression of the bottom of the base on the ground. Pick up the double base. Place the disk in the center square over the ground impression with the washer facing up. Drive the spike through the hole in center of the disk until the head of the spike rests on the washer. Manufacturer advises that this position for the disk is the **only** position that should be used for all play.
- Step 2: Align the recess in the base cover with the installed ground disk. The ground below the base cover should be flat and level with no hollows, depressions or soil buildup.
- Step 3: Step on the cover until it completely snaps over the ground disk and the base lays flat on the ground.

Removal

To remove the cover from the disk, grasp the base and pull upward. The cover will release from the disk. To remove the disk from the ground use a flat bar to pry up on the underside of the disk near the spike. **Do not pull up on the disk with the spike still in place.** This may cause the disk to tear around the holes or pull the spike through and thereby void the warranty.

It is important that a proper and regular maintenance program be followed to insure that the bases will lay flat and level on the field and will perform as intended.

Warranty

Soft Touch® bases are warranted against defects in materials and workmanship when used in a usual and customary manner for one year (defined as a regular season of normal length for softball or baseball). Warranty is void if any changes are made to the original mounting system or not installed as per installation instructions. **Proof of purchase is required in the form of dealer PO number, Invoice number, or any other documentation that will verify when products were purchased.** Normal wear and tear is excluded from coverage. **Pictures of defective merchandise are required** and the Manufacturer may request that merchandise be returned before any warranty adjustment will be made. The liability of the Manufacturer for a warranty is limited to either a refund of the purchase or replacement of the defective product.

Disclaimer

Be advised that sliding into a baseball/softball base may cause serious and permanent injury. No base, however constructed or designed, can prevent all injuries and the Soft Touch® base is no exception. The Manufacturer advises that deviation from installation instructions or failure to properly install and maintain bases and to properly groom playing surfaces around bases and home plate area could increase the risk of injury to players. Under no circumstances should these bases or base anchors be modified, altered, tampered with, or used when they are damaged, as serious injury may occur. Buyer is responsible for furnishing proper installation instructions to the purchaser.

BEAM CLAY®

Soft Touch™ Bases—"S" Series Spike Down Bases Installation Instructions

"S" Series - Spike Down Bases Installation Instructions

These instructions should be read thoroughly before installation. If there are questions concerning the installation or use of these bases, consult Soft Touch® Bases before using them. It is important that a regular maintenance program be followed to insure the bases will lay flat and level on the field and perform as needed.

The patented Soft Touch® base is designed for easy installation, replacement, and removal from playing fields. It is designed to flex and absorb energy as a player slides into the base. A forceful slide applied to the base will disengage it from the mount, to be replaced easily after disengagement.

Step 1: Make sure site is level. Measure and mark the proper location for each base. Place the base cover in proper position with the arrow in the corner of the cover pointing toward the pitcher's mound. Remove the cover and an impression of the underside of the base will be outlined in the dirt.

Step 2: Place the spike tee over the ground impression with the arrow pointing toward the pitcher's mound. Drive the three spikes through the holes in the outer edges of the tee until the heads of the spikes are below the top of the tee. **Note:** Manufacturer advises that pointing the arrow toward the pitcher's mound is the only position that should be used for all play.

Step 3: Align the recess in the base cover with the installed spike tee. The ground below the base cover should be flat and level with no hollows, depressions, or buildup under the base.

Step 4: Step on the cover until it completely snaps over the tee and lays flat on the ground. The ground below the base cover should be flat and level with no hollows, depressions, or buildup under the base.

To remove the tee from the ground use a flat bar to pry up on the underside of the tee near the spikes. **Do not pull up on the tee with the spikes still in place.** This may cause the tee to tear around the holes or pull the spikes through and thereby void the warranty.

Replacement of cover: To replace the base cover after disengagement, smooth dirt around the tee and below the area of the base cover to insure a flat level surface. Shake out any dirt that may be lodged in the underside of the cover. Replace cover and step down on it until it snaps into place.

Warranty

Soft Touch® bases are warranted against defects in materials and workmanship when used in a usual and customary manner for one year (defined as a regular season of normal length for softball or baseball). Warranty is void if any changes are made to the original mounting system or not installed as per installation instructions. **Proof of purchase is required in the form of dealer PO number, Invoice number, or any other documentation that will verify when products were purchased.** Normal wear and tear is excluded from coverage. **Pictures of defective merchandise are required** and the Manufacturer may request that merchandise be returned before any warranty adjustment will be made. The liability of the Manufacturer for a warranty is limited to either a refund of the purchase or replacement of the defective product.

Disclaimer

Be advised that sliding into a baseball/softball base may cause serious and permanent injury. No base, however constructed or designed, can prevent all injuries and the Soft Touch® base is no exception. BEAM CLAY®

Soft Touch™ Bases - "S" Series S15DBL Installation Instructions

"S" Series - S15DBL Installation Instructions

These instructions should be read thoroughly before installation. If there are questions concerning the installation or use of these bases, consult Soft Touch® Bases before using them. It is important that a regular maintenance program be followed to insure the bases will lay flat and level on the field and perform as needed.

The Soft Touch® Double First Base with a spike down tee, disk, and spikes has been designed to alleviate the problems of installation and misalignment with regular double stem bases and ground mounts. **Although the double first base uses the patented disk anchor from the Soft Touch® base system, the base is not designed as a release or pop-off style base.**

PLEASE NOTE The Soft Touch Double First Base is not a "progressive release" or "pop-off" style base due to the dual anchor system and should not be used in that way.

- Step 1: Make sure site is level. Place the double first base on the ground, square to the baseline for 1st base. The orange side should be in foul territory. This will create an impression of the base in the ground.
- Step 2: Place the spike tee over the ground impression of the white side of the base with the arrow pointing toward the pitcher's mound. Drive the three spikes through the holes in the outer edges of the tee until the heads of the spikes are below the top of the tee.
Note: Manufacturer advises that pointing the arrow toward the pitcher's mound is the only position that should be used for all play.
- Step 3: Place the disk in the center of the ground impression on the orange side with the washer facing up. Drive the spike through the hole in the center of the disk until the head of the spike rests on the washer.
- Step 4: Align the recess in the base cover with the installed spike tee and disk. The ground below the base cover should be flat and level with no hollows, depressions, or buildup under the base.
- Step 5: Step on the cover until it completely snaps over the tee and lays flat on the ground. The ground below the base cover should be flat and level with no hollows, depressions, or buildup under the base.

Removal

To remove the cover from the ground, grasp the base and pull upward. The cover will release from the disk and tee. To remove the tee and disk from the ground use a flat bar to pry up on the underside of the tee and disk near the spikes. Do **not pull up on the tee or disk with the spikes still in place**. This may cause the tee or disk to tear around the holes or pull the spikes through and thereby void the warranty.

Warranty

Soft Touch® bases are warranted against defects in materials and workmanship when used in a usual and customary manner for one year (defined as a regular season of normal length for softball or baseball). Warranty is void if any changes are made to the original mounting system or not installed as per installation instructions. **Proof of purchase is required in the form of dealer PO number, Invoice number, or any other documentation that will verify when products were purchased.** Normal wear and tear is excluded from coverage. b and the Manufacturer may request that merchandise be returned before any warranty adjustment will be made. The liability of the Manufacturer for a warranty is limited to either a refund of the purchase or replacement of the defective product.

Disclaimer

BEAM CLAY®

Soft Touch™ Bases—"C" Series Convertible Bases Installation Instructions

"C" Series - Convertible Bases Installation Instructions

These instructions should be read thoroughly before installation. If there are questions concerning the installation or use of these bases, consult Soft Touch® Bases before using them. It is important that a regular maintenance program be followed to insure the bases will lay flat and level on the field and perform as needed.

The patented Soft Touch® base is designed for easy installation, replacement, and maintenance. It is designed to flex and absorb energy as a player slides into the base. A forceful slide applied to the base will disengage it from the mount, to be replaced easily after disengagement.

The Soft Touch® Convertible Tee will fit any existing 1" ground anchor stem or 1 ½" ground anchor sleeve.

Installing ground anchors: (If you already have 1" or 1 ½" ground anchors in your field proceed to Step 5)

Step 1: Build a form for the 1" or 1 ½" anchor of your choice. Center the anchor and fill form with concrete.

Step 2: Make sure site is level. Measure and mark the proper location for each base and excavate a hole.

Step 3: Place and level the anchors. The top of the ground anchor should be 1" below the playing surface. The ground tee will be at a 45° angle to the base line and level with the ground at the final installation.

Step 4: Bury the anchor adding soil a couple of inches at a time compacting thoroughly. The stem of the tee should not make contact with any concrete of the ground anchor and should lay flat on the ground. The tee should be fully supported at all points of the playing field.

Step 5: Place the tee in the ground anchor with the longest part of the tee facing away from the pitcher's mound.

Step 6: Align the recess in the base cover with the tee. The arrow on the base should be pointing toward the pitcher's mound. Manufacturer advises that pointing the arrow towards the pitcher's mound is the only position that should be used for all play.

Step 7: Step on cover until it completely snaps over the tee and lays flat on the ground. The final position of the base should be square with the base line. The ground below the base cover should be flat and level with no hollows, depressions, or buildup under the base.

Replacement of cover: To replace the base cover after disengagement, smooth dirt around the tee and below the area of the base cover to insure a flat level surface. Shake out any dirt that may be lodged in the underside of the cover. Replace cover and step down on it until it snaps into place.

Warranty
Soft Touch® bases are warranted against defects in materials and workmanship when used in a usual and customary manner for one year (defined as a regular season of normal length for softball or baseball). Warranty is void if any changes are made to the original mounting system or not installed as per installation instructions. **Proof of purchase is required in the form of dealer PO number, invoice number, or any other documentation that will verify when products were purchased.** Normal wear and tear is excluded from coverage. **Pictures of defective merchandise are required** and the Manufacturer may request that merchandise be returned before any warranty adjustment will be made. BEAM CLAY®

Soft Touch™ Bases - "IN" Series Indoor Bases Installation Instructions

"IN" Series - Indoor Bases Installation Instructions

These instructions should be read thoroughly before installation. If there are questions concerning the installation or use of these bases, consult Soft Touch® Bases before using them.

The Soft Touch® Indoor Base has been designed to allow for practice year round with the same intensity and safety as outdoor play. The suction cup mounting system applies to any smooth practice surface.

Step 1: Wipe the surface with a clean cloth, removing dirt and dust from the area where the base will be placed. The base will work best on a smooth seamless surface.
IMPORTANT: Be sure vacuum tee will hold firmly to floor. A square friction pad has been provided for use on floor surfaces that do not have a smooth seamless surface. Wipe area, pad and suction cups and lay the pad in the proper location.

Step 2: Measure and mark the proper location for each base. Insert the tee into the under side of the base. Place the base cover in the proper position with the arrow in the corner pointing toward the pitcher's mound.

Note: Manufacturer advises that pointing the arrow toward the pitcher's mound is the only position that should be used for all play.

Step 3: Place the base cover with the vacuum cupped tee on the floor/pad. Step down on the base cover to create the vacuum needed to adhere the cups to the floor. Check the base to be sure the vacuum cups are holding the base in place. You are now ready for play.

Sliding into this base **IS NOT RECOMMENDED**.

Removal

To remove base from floor, pull base cover off of tee. Then remove the tee by pulling up one edge of vacuum cup until it releases.

It is IMPORTANT that the bases be checked before each use to be sure that the vacuum cups are holding the base in place.

Warranty

Soft Touch® bases are warranted against defects in materials and workmanship when used in a usual and customary manner for one year (defined as a regular season of normal length for softball or baseball). Warranty is void if any changes are made to the original mounting system or not installed as per installation instructions. **Proof of purchase is required in the form of dealer PO number, Invoice number, or any other documentation that will verify when products were purchased.** Normal wear and tear is excluded from coverage. **Pictures of defective merchandise are required** and the Manufacturer may request that merchandise be returned before any warranty adjustment will be made. The liability of the Manufacturer for a warranty is limited to either a refund of the purchase or replacement of the defective product.

Disclaimer

Be advised that sliding into a baseball/softball base may cause serious and permanent injury. No base, however constructed or designed, can prevent all injuries and the Soft Touch® base is no exception. The Manufacturer advises that deviation from installation instructions or failure to properly install and maintain bases and to properly groom playing surfaces around bases and home plate area could increase the risk of injury to players. Under no circumstances should these bases or base anchors be modified, altered, tampered with, or used when they are damaged, as serious injury may occur. Buyer is responsible for furnishing proper installation instructions to the purchaser.

Soft Touch™ Bases - "T" Series Turf Bases Installation Instructions

"T" Series - Turf Bases Installation Instructions

These instructions should be read thoroughly before installation. If there are questions concerning the installation or use of these bases, consult Soft Touch® Bases before using them.

The patented Soft Touch® base is designed for easy installation and maintenance. It is designed for use on synthetic playing fields.

The Soft Touch® for Turf is not a "progressive release" or "pop-off" style base. It is considered a "throw down" base. Also, it is not a stationary base.

Our unique design requires no mounting system and sits securely on the synthetic turf. Simply measure and mark the location for each base and place the base on the field. Easy to install, Soft Touch® for Turf can remain on the field year round or set up for game-time.

Warranty

Soft Touch® bases are warranted against defects in materials and workmanship when used in a usual and customary manner for one year (defined as a regular season of normal length for softball or baseball). Warranty is void if any changes are made to the original mounting system or not installed as per installation instructions. **Proof of purchase is required in the form of dealer PO number, Invoice number, or any other documentation that will verify when products were purchased.** Normal wear and tear is excluded from coverage. **Pictures of defective merchandise are required** and the Manufacturer may request that merchandise be returned before any warranty adjustment will be made. Soft Touch™ Bases

Breakaway Base Rule Goes Into Effect Soon

WILLIAMSPORT, Pa. (Oct. 3, 2006) – Local Little Leagues have until the 2008 season to install breakaway bases for all levels of play, if they have not already done so.

So now is the best time to get this important project done!

The new rule appeared in the 2006 baseball and softball rule books of Little League:

Rule 1.06: Beginning with the 2008 season, it will become mandatory that all leagues utilize bases that disengage their anchor. Leagues are encouraged to begin the process of implementing these types of base systems during the current season on all their fields so that the process is completed by the 2008 season.

Soft Touch™ Youth Bases are Little League Approved
