For special features (Lacing Lips, Air Vents, Extra Grommets, Two Color Panels) See Page 6

HOW LONG IS YOUR OUTFIELD FENCE?

Outfield fences can be symmetrical (the same distance from home plate to the fence at all points) or like major league parks with different distances to center field and mid-field. The following chart provides approximate outfield fence lengths assuming a center field depth 10% - 15% deeper than the foul lines. If symmetrical, you may approximate your fence length by multiplying 1.57 by the average distance from home plate to the fence.

DISTANCE TO FOUL POLE	APPROX. LENGTH OF FENCE
180 feet	300 feet
200 feet	360 feet
225 feet	395 feet
250 feet	435 feet
290 feet	490 feet
300 feet	515 feet
315 feet	550 feet

WINDSCREEN LETTERING

Block-style letters or numbers factory applied to your windscreen order. Select white, black, or yellow letters or numbers. See page 9

CUSTOM WINDSCREENS
SPECIAL FEATURES & INSTALLATION ACCESSORIES

LACELIP

LACING LIP - Attaches windscreen more securely to fence.

75¢/LF

Horizontal or Vertical Lacing Lip attaches middle of windscreen to fence in addition to the four edges. Lacing Lip is 2 reinforced layers of material, folded to stick out the back, covered and double sewn or 2 layers of vinyl coated material heat-sealed edging with grommets every 18" to attach securely to fence and reduce flapping. **Lacing Lip is required sewn horizontally at center of windscreen along entire length of all windscreens over 6'H.** Check price for more than one lacing lip.

AIR VENTS, TIES & EXTRA GROMMETS

AV-HALFCIRCLE	18" Diameter Half Circle Cut-Outs (without Edging, with or without flap)	\$4
AV-REINFORCEDAV	Reinforced Air Vents - 6" H x 12" L, usually every 10'	\$12
PT-8BK	Standard 8" UV-Resistant Black Plastic Ties , 50 lb. Breaking Strength (Packs of 100)	\$10
PT-HD-8BK	Heavy-Duty 8" UV-Resistant Black Plastic Ties , 120 lb. Breaking Strength (Packs of 100)	\$16
PT-HD-14BK	Heavy-Duty 14" UV-Resistant Black Plastic Ties , 120 lb. Breaking Strength (Packs of 100)	\$30
GROMMETS	Grommets every 12" instead of 18"	5¢/SF
TIEROPE-BK	Polyester Tie Rope , Black, 1/8" x 250' Spool	\$34
CUSTOMCUTOUTS	Custom Cut Outs (each - up to 10 SF)	\$115
CUSTOMANGLECUTS	Custom Angle Cuts (each—per angle)	\$115

A lacing lip prevents windscreen from billowing and breaking away, ensuring longer life.
>Standard on all screens over 6' high.
>Vinyl coated windscreen is heat-sealed and stronger
>Polypropylene & Polyethylene windscreen is banded and sewn

TWO COLOR WINDSCREEN PANELS

Available for ArmorMesh, VCM9x12 & VCP1800 at 40% additional charge.
 2 different color panels joined with heat-sealed seams.

TCWS-TB+40	Top/Bottom (Horizontal Seam, 12" high minimum)	ADD 40%
TCWS-SS+40	Side x side (vertical seam, minimum 6' long panels)	ADD 40%

Measurements:

Our windscreens are custom made to your dimensions. Measure carefully.

When ordering, please have dimensions ready for each section of windscreen, including gates. There is no extra charge for these smaller pieces. We recommend leaving 6"-12" open at bottom for maintenance and air flow. For long runs 50'-100' pieces work best. Much longer pieces become more difficult for you to install.

Tall Windscreens:

When 2 woven polypropylene rolls are used to make a taller windscreen: one material overlaps the other (and is double sewn with 2 layers of banding) to make a seam (like lacing lip w/o sticking out back and w/o grommets); whereas ArmorMesh, VCM9x12, and VCP1800 seams are heat-welded and do not require the more visible banding. Horizontal lacing lip required for windscreens over 6'H.

AER-FLO® DUO-SCREEN™ WINDSCREEN

Joins Vinyl with Tuffy Windscreen. Choice of solid midsection (shown) for improved player vision or Tuffy midsection with solid vinyl top and bottom for improved court viewing. Windscreen is finished with double-needle LOCK STITCHING, eliminating the thread unraveling problem of traditional windscreens that are fully chain-stitched. 4-year limited warranty. See 23 available colors below. Optional multi-color Chroma-Bond imprinting available. Grommets installed every 12". Not only unique for tennis courts, but also provides a perfect background for logo on baseball, softball, soccer and football fields.

SOLID VINYL - POLYESTER to minimize problems of wind and background visual distractions. Made of high quality 18 oz. UV and mildew treated vinyl in 17 outdoor colors or 16 fire rated indoor colors. Grommets installed every 12". Custom sizes are available. Whether indoor or outdoor, optional multi-color Chroma-Bond imprinting available.

Tuffy® BALLASTED WINDSCREEN

Protects chain link fences from high wind damage and can SAVE COSTLY LABOR TIME in last minute pre-storm preparations

PATENTED Tuffy Ballasted Windscreen automatically opens to allow high velocity winds thru . . . NO MATTER THE DIRECTION OF THE WIND. **HOW IT WORKS:** Individual 5' wide X 6' tall Ballasted Windscreen units are attached to chain link fence only along their grommeted tops, BUT the units are installed alternately on both sides of the fence. The bottom of each section has a weighted PVC pipe inserted thru its entire width in a reinforced pocket, engineered to provide correct ballast to keep the windscreen unit vertical during lighter winds. It automatically opens up to let higher velocity winds flow thru, significantly reducing wind stress on the fence. **SINCE HALF OF THE WINDSCREEN UNITS ARE ON EACH SIDE OF THE FENCE, HALF OF IT OPENS UP NO MATTER THE WIND'S DIRECTION.** Made with super-tough VIPOL® Matrix in 23 colors. Due to its dynamics, it carries no expressed or implied warranty, but ... **THOUSANDS HAVE BEEN IN USE BY SCHOOLS, GOVERNMENT OPERATIONS, AND PRIVATE CLUBS FOR UP TO 7 YEARS.** This fully tested system is ready to protect your fences.

U.S. PATENT NO. 7,841,378

ACTUAL INSTALLATION

DEPICTION

TIE-UP FEATURE: Built-in hook & loop strips at top allow one person to roll up and secure entire unit in less than 30 seconds. Also useful for better tournament viewing

NORMAL POSITION: In calm to low winds, units stay in vertical position. Ballasted PVC pipe is in the reinforced pockets at bottom, and top is attached thru grommets.

STORM POSITION: As winds exceed 20 mph, units billow to allow potentially damaging high wind velocities to blow through, helping to PROTECT FENCE and WINDSCREEN.

BALLASTWS —BALLASTED WINDCREEN—ONE SIZE ONLY—6'H x 5'W	\$135/EA

Our sharp multi-color images will outlast other processes. Eliminates the historic problems of digital printing, like weathering, premature fading, scuffing, and unsightly white mesh backside color. Images will last outdoors as long as the fabric, something rarely true with digital imprinting. Also highly spike, cleat, and racquet resistant. Our thick, individually-applied, double coating process literally bonds the image into the vinyl and completely masks the underlying fabric color, so image colors are vivid and true.

Chroma-Bond imprinting is available on our vinyl-surfaced windscreen, cover, padding & sign products.

How to Measure for your Fence's Windscreen

Windscreens come in a number of styles, grades, heights, lengths and colors. Proper measurements equal proper fittings, which in turn equals a professional appearance that is sure to enhance the look of your facility.

Measuring your facility's fences is actually a pretty easy project. Prior to starting, you'll need the following tools:

Measuring tape (100'+ in length is preferable) or Measuring Wheel

A pencil or pen to document the measurements.

Field or court diagram showing the fences that will require windscreen. If a diagram is not available, a hand drawn one will help you keep things straight.

With your tools in hand and the step-by-step process below, you're ready to begin measuring.

1. Start with your fence height. For the most part, your fence will remain relatively the same height through out. However, measuring a tennis court will be different than fencing for field sports. Tennis courts are flat surfaces that allow the fence to be the same height all the way around. With field sports, you may have an uneven ground surface which will cause your height measurements to vary slightly. A good rule of thumb is to measure from the bottom of the upper crossbar down to the ground and subtract 3" to 6" for maintenance. It is important to pull the measuring tape tight so that there is no slack. If installing "top bar to bottom bar" or "inside tension bar to inside tension bar" allow one fence diamond exposed top & bottom or each side for attaching windscreen. It's better you if measure an inch too short than too long, to account for stretching. **The windscreens are custom made to the dimensions you provide.**
2. Follow-up the fence height measurements with fence length measurements.
3. For ease of handling, 50'-100' panels work best for ballfield fences. Another consideration is that if you need to replace a panel for whatever reason, it will be cheaper to replace a 50'-100' section versus a much larger section.
4. If there are any angle cuts, be sure you are measuring the side that the windscreen will attach to.
5. Label each segment on your diagram so that when your windscreen arrives, you can put it together correctly and match each segment to the right place on your fence. Send us a copy of this diagram when you place your order so that each windscreen will be properly labeled when it is shipped to you.

REMEMBER... DON'T "GUESSTIMATE". NO TWO FENCES ARE THE SAME!

YOUR "ONE-STOP" SOURCE FOR AMERICA'S BASEBALL, SOFTBALL & SPORTS SURFACES & SUPPLIES!

PRICES SUBJECT TO CHANGE & AVAILABILITY PLUS SHIPPING | VOLUME DISCOUNTS AVAILABLE | COOPERATIVE PURCHASING CONTRACT PRICING FOR 50 STATES

Installing Your Windscreen

1. Hang the windscreens so that the seams and hems are toward the fence, leaving the smooth side facing the court.

2. **ALL GROMMETS MUST BE USED** to secure the windscreens to the fence.
 First, fasten one vertical edge at the desired height to the fence using regular (50-lb breaking strength) UV resistant plastic ties.
 Next, fasten the top of the windscreen to the fence, keeping the top straight by following the chain-link pattern. Use regular (50-lb breaking strength) UV resistant plastic ties
 Next, fasten the remaining sides of windscreen to the fence with regular (50-lb breaking strength) UV resistant plastic ties.
 Finally, fasten the bottom with regular (50-lb breaking strength) UV resistant plastic ties or, if the windscreen will be rolled to the bottom during high winds, with heavy-duty (120-lb breaking strength) UV resistant plastic ties.

3. With anti-billowing horizontal lacing lip, fasten it after top and bottom are attached using regular (50-lb breaking strength) UV resistant plastic ties through each grommet.

4. To prevent damage, when high winds are expected, cut away the regular (50-lb breaking strength) UV resistant plastic ties that you have used for the top, sides, & any horizontal lacing lips. Roll the windscreen to where the heavy-duty (120-lb breaking strength) UV resistant plastic ties are attached and tie it up using 14"-long (120-lb breaking strength) UV resistant plastic ties to help prevent wind damage.

5. In climates that get freezing temperatures, high winds and snow, **we recommend that windscreens be taken down for the winter months and rehung in the spring.** *If windscreens are left on the fences during the winter in these areas, they must be at least rolled down and secured.*

If windscreens are not rolled or removed, all warranties are null and void. There is also a strong chance that the winter winds will cause your chain-link fencing to bend.

PRIVACY DECORATIVE SLATS (PDS®) FOR CHAIN LINK FENCING

Made in the USA: Be aware of some non-USA made fence slats that may fade and discolor. Our PDS® slats are made of virgin High Density Polyethylene (HDPE) are made in the USA and have UV inhibitors (UV resistant color concentrates) to add color protection and guard against cracking, chalking, and fading in the sunlight.

Durability: Our PDS® slats are resistant to: severe weather conditions, salt water, sand, road dirt, most acids, alcohol, alkaline, ammonia, petroleum distillates and common environmental pollutants.

**Standard Colors***

* Exact representation of slat colors in printing is difficult. Please refer to actual color samples for final matching.

* Special colors are available upon request. Minimum quantities apply.

* Made in the USA

ASTM

"Meets ASTM3000 and ASTM3000M specifications"

Materials

All except Hedgelink® are extruded from High Density Prime Polyethylene, color pigments and ultra violet (UV) inhibitors, specifically designed to retard the harmful effects of the sun and lengthen the life of the product.

Maintenance

Cleaning of most surface contaminants is quickly accomplished with plain water.

Wind Load Disclaimer

Seller/Manufacturer will not be responsible for fence damage resulting from wind load conditions due to insufficient structural support.

Limited Warranty

PDS® Fence Products carry an extensive, pro-rata warranty against breakage and material degradation under normal conditions.

**WHAT SIZE PDS® FENCE SLATS WILL WORK IN YOUR CHAIN LINK FENCE?**

The PDS® Fence products are available in a variety of Fence Privacy Slats (Inserts), which fit in different sizes of chain link fencing. We have Fence Slats that fit into the following diamond sizes: 1-3/4", 2", 2-1/4", 2-3/8" and 3-1/2" x 5".

Before you order Fence Slats, you must first determine the size of the "diamond" on your fence. This is done by measuring the inside dimensions diagonally in both directions. (See Photos Above)

Please note: The wire gauge (thickness), will affect the fit of our Fence Slats. Each product in this brochure includes a chart to show what size Fence Slat needs to be ordered for the various diamonds and gauge combinations available in the marketplace.

Above is a measurement of a 2" Chain Link Diamond.

YOUR "ONE-STOP" SOURCE FOR AMERICA'S BASEBALL, SOFTBALL & SPORTS SURFACES & SUPPLIES!

PRICES SUBJECT TO CHANGE & AVAILABILITY PLUS SHIPPING | VOLUME DISCOUNTS AVAILABLE | COOPERATIVE PURCHASING CONTRACT PRICING FOR 50 STATES

BOTTOM LOCK

Bottom Lock utilizes our innovative bottom locking channel system providing a "snap-in" locking effect for security and deters vandalism at an affordable price.

Design: Bottom-Lock Slats are flat and tubular in shape, with two "legs" inside the rigid, hollow body of the slat, for extra durability.

Installation Instructions:

Step 1 Insert locking channel horizontally in first full diamond at bottom of fence with open side facing up.

Step 2 Insert vertical slats with beveled/notched end downward. Slat engages and interlocks with bottom rail.

Step 3 Push the vertical slat into the horizontal channel to lock in place.

Standard Heights: 4, 5, 6, 7, 8, 10 and 12 feet. Special heights available upon request.

Wind Load and Privacy Factor: Approximately 75%.

Bottom-Locking Channel: 10 feet provided in each bag.

Slat Length: 3½" shorter than the overall height of fence.

Warranty: 25 years pro-rata.

SLAT PROFILE:

LOCKING CHANNEL:

Slat Type	Slat Width	Mesh Size	Wire Gauge	Slats Per Bag
Bottom Lock 2"	1½"	2"	8, 9 or 11	82
Bottom Lock 2¼"	1¼"	2¼" or 2½"	11½ or 12½	78
Bottom Lock 1¾"	7/8"	1¾"	8, 9 or 11	100
*Bottom Lock 1½"	7/8"	2"	6	100

*Choosing this option will significantly decrease the privacy factor.

TOP LOCK

Top Lock utilizes a top-locking mechanism located near the top of the slats for easy installation and to ensure a clean, straight edge, enhancing its appearance.

Design: Top-Lock Slats are flat and tubular in shape, with circular, notched-out holes located near the top of the slat.

Installation Instructions:

Step 1 No need to kneel, simply insert the slats vertically from top to bottom, keeping the locking holes on top.

Step 2 Thread the flexible locking channel horizontally through the notched holes in the slats. These holes are elliptical to ensure they always stay open for fast and easy threading.

Step 3 For extra security, insert a pop-rivet through locking channel and one slat.

Standard Heights: 4, 5, 6, 7, 8, 10 & 12 feet. Special heights available upon request.

Wind Load and Privacy Factor: Approximately 75%.

Top-Locking Channel: 10 feet provided in each bag.

Slat Length: 2" shorter than the overall height of fence.

Warranty: 25 years pro-rata.

SLAT PROFILE:

Slat Type	Slat Width	Mesh Size	Wire Gauge	Slats Per Bag
Top Lock 2"	1½"	2"	8, 9 or 11	82
Top Lock 2¼"	1¼"	2¼" or 2½"	11½ or 12½	78
Top Lock 1¾"	7/8"	1¾"	8, 9 or 11	100
*Top Lock 1½"	7/8"	2"	6	100

*Choosing this option will significantly decrease the privacy factor.

PRICES SUBJECT TO CHANGE & AVAILABILITY PLUS SHIPPING | VOLUME DISCOUNTS AVAILABLE | COOPERATIVE PURCHASING CONTRACT PRICING FOR 50 STATES

With the proven quality and durability of our standard slats, plus unique flexible "wings" for extra screening and security, Winged Slats® are self-locking - no locking channels are needed!

The FinLink® slat offers extra screening and security with a unique configuration of (3) three privacy fins.

Design: Our innovative Winged Slat has a rigid, flat-tubular body, with two "legs" inside the rigid, hollow body of the slat for extra support and durability. Flexible and resilient wing portions are positioned on each side of the slat body. Serrations are added to the wings for easier installation and locking power.

Installation Instructions: Insert vertical slats with angle cut end downward. Winged portion interlocks with chain link knuckles.

Standard Heights: 4, 5, 6, 7 and 8 feet.

Important: For Fence heights higher than 8 feet, we strongly advise **NOT** to double-stack Winged Slats®. If you double-stack, you will be at risk of the Winged Slats® not all giving the same visual appearance or giving the same privacy effect on the top and bottom portions of the Fence.

Wind Load and Privacy Factor: Approximately 90%. (Based on wire/mesh used - stretch tension)

Slat Length: 2" shorter than the overall height of fence.

Warranty: 25 years pro-rata.

Design: Our unique innovative design includes a rigid, flat tubular body, with a "leg" inside the rigid, hollow body of the slat for extra support. Three flexible fins (two on one side and one on the other) are positioned on the sides of the slat body. The FinLink® fins are not serrated, thus providing a smooth finished look.

Installation Instructions:

Step 1 Insert locking channel horizontally in first full diamond at bottom of fence with open side facing up.

Step 2 Insert vertical slats with bevel end downward.

Step 3 Push the vertical slat into the horizontal channel until the slat touches the bottom of channel.

Standard Heights: 4, 5, 6, 7 and 8 feet.

Wind Load and Privacy Factor: Approximately 90%.

Bottom-Locking Channel: 10 feet provided in each bag.

Slat Length: 3½" shorter than the overall height of fence.

Warranty: 25 years pro-rata.

LiteLink® is a single wall "M" shaped slat that gives visual screening and color enhancement at our most affordable price. It also uses our innovative Bottom-Locking Channel system.

Design: Compact and lightweight, LiteLink®'s unique shape enables the slat to self stack. It comes packaged in a box (2" x 5" x Slat Length), making it easy to ship and efficient to store.

Installation Instructions:

Step 1 Insert locking channel horizontally in first full diamond at bottom of fence with open side facing up.

Step 2 Insert vertical slats with interlocking tab downward. Slat engages and interlocks with bottom rail.

Step 3 Push the vertical slat into the horizontal channel to lock in place.

Standard Heights: 4, 5, 6, 7, 8, 10 and 12 feet. Special heights available upon request.

Wind Load and Privacy Factor: Approximately 75%.

Slat Length: 3½" shorter than the overall height of fence.

Warranty: 7 years pro-rata.

Slat Type	Slat Width	Mesh Size	Wire Gauge	Slats Per Box
LiteLink®	1¼"	2", 2¼" or 2¾"	9, 11 or 11½	82

HedgeLink® is our most premium and unique chain link fence enhancement product, which creates a natural green hedge look that requires no maintenance and offers almost complete privacy.

Design: The HedgeLink® core is made with a strong, rigid 16-gauge galvanized, braided wire. Blue Spruce colored 3-mil PVC needles are embossed for an extra plush effect.

Installation Instructions: Requires no locking device or tools and installs much like our Winged Slats®. Insert HedgeLink® slats vertically top to bottom, keeping the green needles facing up, while revolving the slat clockwise with your fingers for easier installation.

Standard Heights: 4, 5, 6, 7, and 8 feet.

Wind Load and Privacy Factor: Approximately 95%.

Fence Sizes: For most Chain Link Fence sizes. Not intended for use with mini-mesh or 3½" x 5" fence fabric.

Features: UV stabilized to protect against the harmful rays of the sun. Flame retardant.

Note: Do not mix HedgeLink® with any other manufacturer's hedge product – color shades are different.

Warranty: 10 years pro-rata.

Slat Type	Mesh Size	Wire Gauge	Slats Per Box	Approx. Coverage Per Box
HedgeLink®	2", 2¼" or 2¾"	9, 11 or 11½	82	10 linear ft
