## BALL NETTING

Protective and boundary netting is used to protect players, spectators, scoreboards, buildings and other structures in and around the ball park. The netting is customized to fit your needs and is completely weather-treated. Netting is either finished with black reinforced double sewn reinforced vinyl edging with brass grommets every 18" or a rope border. The reinforced edging provides the net with added strength while keeping the net's shape. Reinforced double stitched vinyl also gives the net a sharp appearance. Rope border offers a simple easy installation.
