BEAM CLAY®

Grand Slam Fencing™ Portable Safety Fencing

Above-Ground Grand Slam Fencing™ (patent pending)

FOR SYNTHETIC TURF & CROWD CONTROL

Portable fencing that can be used on synthetic turf, asphalt, concrete and natural turf too! **No holes required!**

ALL OF THE GREAT Features OF IN-GROUND GSF (except no sockets or foul poles):

- Durable, yet soft and easy-to-handle
- Quick and easy to set up and take down
- Available in red, blue and green, all with yellow home run marker
- Standard: poles at 10' intervals
- Optional: poles at 5' intervals
- Weighting for each pole to stand up to wind and prevent tipping

Benefits of above-ground Grand Slam Fencing:

- An attractive, durable and cost-effective solution for baseball/softball, and perimeter and crowd control needs
- Lightweight, making installation and removal quick and easy – no barriers to move and minimal storage space required!
- A fraction of the cost compared to other aboveground barrier options
- Perfect for any event including festivals, trade shows and sports games where drilling holes is not an option or not preferred

WHAT TO EXPECT:

- AGGSF will move when players impact the fence. Poles will bend and base weights will move.
- AGGSF will also move or blow over from strong winds. Adjustments to pull fence taut or to upright poles will be needed if the fence remains on the field for the season.
- AGGSF is durable, but not indestructible – regular bending of poles and strain on 4-way bases fitting (e.g. bending of fence to retrieve balls instead of walking around fence) will eventually result in breakage. Replacement parts are available for purchase. Minimizing wear-and-tear on fence parts will lengthen the life of AGGSF.

(not recommended for use during 30 MPH winds or greater)

Above-ground GSF on natural turf

Above-ground GSF on synthetic turf

Above-ground GSF for crowd control

ABOVE-GROUND GSF FEATURE

Weighted base keeps fence in place

Grand Slam Fencing™ Standard Length Kits

Benefits:

- Easier handling of smaller sections
- Can design with overlap/gap in sections for ball retrieval
- Design flexibility—can change outfield distance by adding or eliminating sections

For 300' home run distance (baseball) you can use 500' of fencing.

Recommended kits:

- 2 each 150' fence kits
 - 2 each 100' fence kits
- Extra fencing allows for extension beyond foul line for overlap

Common field designs using our standard length kits.

To calculate the fencing needed for foul-pole to foul-pole, multiply the home run distance by 1.57. (200' home run distance x 1.57 = 314' of fencing)

For 200' home run distance (softball & little league) you need a minimum 314' of fencing.

Recommended kits:

- 1 each 150' fence kits
 - 2 each 100' fence kits
- Extra fencing allows for extension beyond foul line or overlap.

4' HIGH ENDURO FENCING with Yellow Top Tape

Sets a new standard for Simplicity, Durability & Appearance.

Simply slide the poles through the permanent vinyl pockets in the mesh fencing and drive the **SmartPole** into the turf with a rubber mallet. You're done—no ropes, ties, clips, hooks, etc. The vinyl pockets, spaced every 10 ft., create an attachment to the pole that is uniform top to bottom for excellent durability and appearance. Steel pilot hole tool is included for hard ground. Optional ground sockets available.

ENDURO FENCING PACKAGES

Includes revolutionary **Enduro** polyethylene mesh fencing material w/permanent vinyl pole pockets, two white **SmartPole** anchor poles and Heavy-duty Smart flex poles and pilot hole tool. Specify Color: Dark Green, Red or Blue fencing.
