**Dog Park Surfacing**

## DOG PARK SURFACING

Available in 3/16" minus Burgundy Red, Grey, Tan or White aggregates blended with either a 20% Beam Clay® Binder for smoother surface, or a 5% Beam Clay® Binder for a somewhat crunchier surface, or "Stabilized" with Stabilizer® a natural organic binder at rate of 15 lbs. per ton for an even firmer, yet more resilient surface—each with excellent drainage and resistance to erosion. Excellent natural surfaces for walking paths, jogging trails, driveways, or patios.

Easy to maintain: Recommended maintenance is to scarify and roll each spring. Otherwise, drag mat as needed to maintain smooth surface. Recommended depth is 1" - 3" depending on your base. If poorly draining soil, stabilize base first with 3/4" minus road stone.

**3/16" Red, Grey, Black, White or Tan Dog Park Mix with Natural Beam Clay® Binder**

One cubic yard weighs approximately 2,700 lbs. in red, approximately 3,240 lbs. in grey, black white or tan, plus add 20% for compaction. Each 1" compacted requires approximately 5 tons per 1,000 square feet for red, 6 tons for grey, black, white or tan.

	<b>\$4.25/sf</b>

**PLEASE NOTE:**

Synthetic Turf is normally rolled face out. No charge to "reverse roll" cut pieces with turf faced in—which makes it easier to install—doesn't need to be flipped over.

There is a \$2 per linear foot charge (**#CPTCUT**) to cut the width (there is a 1/4" tolerance) and/or pre-trim (**#CPTTRIM**) the scrim fabric along edge with a \$100 minimum charge. Pre-trimming scrim can be done on site with scissors.

If gluing to concrete, use Robert's 6700 glue from Home Depot if 65° or warmer, Turf Claw™ if 55°+, or Nordot 34-G if 50°+.

If installing over compacted aggregate, you need to spike perimeter and tape (12" w) & glue seams.

Turf Claw™ can be shipped with your turf order. Check current pricing for tape & glue per quantity needed.

If installing over macadam, be sure glue is compatible with macadam or loose lay with 2-3 lbs. sand to weigh the turf down, plus tape & glue seams.

If gluing SilverBack™ polyurethane backing, make sure glue is polyurethane compatible.

1 mm rubber backing does not expand or contract as much as other backings and is especially used for loose lay applications.

Scrim on foam backing keeps the foam from cracking when stored rolled up in warehouse.

Scrim will not curl if gluing down but will curl if installing over crushed aggregate without securing the perimeter.

Use foam back with scrim for gluing to concrete or asphalt. Use foam without scrim for installing over crushed aggregate unless securing perimeter.
