

BEAM CLAY[®]

BASEBALL & SOFTBALL

INFIELD MIXES

BEAM CLAY[®] BASEBALL DIAMOND MIX PRO PREMIUM (3MM) OR ORIGINAL PREMIUM (4MM)

Our Original Premium Infield Mix. Used by Pro Teams, Colleges, Towns & Schools Across the USA and Canada. Also available is our Pro Premium (slightly finer) grade.

Made from uniform orange sand and red **Beam Clay**[®] with our special binding process that reduces wind and water erosion. Doesn't separate and blow away! Doesn't become dusty in stadiums! With proper maintenance, provides firm traction without tracking, excellent drainage while retaining playing moisture, distinctive reddish/orange color, works up readily, no separation of ingredients, long lasting, safe to slide on - for safe, attractive, consistent professional quality baseball diamonds.

MEDIUM OR MEDIUM PRO INFIELD MIX

Slightly less reddish/orange color, clay content, and processing. Excellent in-between mixes at an in-between price.

LITE INFIELD MIX

Light orange color and less clay, but a good uniform infield mix, at an economical price.

NEW 2017 RED INFIELD MIXES FOR THE NORTHEAST

Deep red color, all natural-**PERMANENT**-no dyes to quickly fade, available in three different grades: Pro Premium (3mm), Original Premium (4mm), or Medium (6mm).

REGIONAL INFIELD MIXES

Regionally produced red infield mixes designed for every state and climate.
